**Abstract**

In this paper, *Allium amethystinum* is reported, for the first time, for the flora of the Republic of Macedonia. It is a Mediterranean species, distributed in central and eastern Mediterranean region. The presence of *A. amethystinum* confirms the sub-Mediterranean character of a part of the flora of the Republic of Macedonia. From the valley of r. Crn Drim, its distribution area extends mostly along the r. Treska. Photographs of its habitats, parts and different stages of the plants as well as drawings of the floral parts that characterize the species, are also given.

**Key words:** *Allium amethystinum*, sub-Mediterranean flora, Republic of Macedonia.

**Introduction**

This report of *Allium amethystinum* Tausch, as well as the recent reports of few other species (Teofilovski, 2017, Matevski, 2017, Niketić & al., 2017 and others) are the best evidence that the research of the flora of the Republic of Macedonia, with about 150 years of more or less intensive floristically research, is far from being finished.

*A. amethystinum* (Fig. 1) is a Mediterranean element, distributed in central and eastern Mediterranean region: Southern Italy, former Yugoslavia, Albania, Bulgaria, Greece, Crete, East Aegean islands, NW, W, SW Turkey (Stearn, 1978, 1980; Kollman, 1984; Mathew, 1996). The existing distribution map in the World Checklist of Selected Plant Families (2010), corresponds to the data of the above-mentioned authors. In both cases, the whole territory of the former Yugoslavia is marked as a part of the distribution area of this species. That, in many cases, is confusing and doesn't give the real picture about the presence of the species in different parts on the territory of the former state. Years earlier Bothmer (1972) gave more precise data about the distribution of this species on the territory of former Yugoslavia. According to his data, the territory of the Republic of Macedonia is not included in the distribution area of *A. amethystinum*. Therefore, it has been concluded, basing on this and the other data from the available literature, that there are no information about the presence of *A. amethystinum* on the territory of the Republic of Macedonia.

**Material and methods**

The material, collected from the listed localities in the period from 1998 to 2017, is deposited in the Herbarium of the Macedonian Museum of Natural History (HMMNH) (localities 1-3), along with the material collected by Aco Teofilovski (localities 4-8), kept in his private collection. Standard botanical literature was used for the material's determination (Garbari, 1982; Stearn, 1978, 1980, 1981; Kollman, 1984; Mathew, 1996; Wraber, 1999). Photographs were taken from the typical habitats (Fig. 5) as well as from the different stage of the plant's development and parts. Drawing's from different floral parts, which characterized the species, are presented, as well.

**Results and discussion**

*Allium amethystinum* Tausch, Syll. Pl. Nov. Ratisb. 2: 256 (1828)

[Syn.: *A. segetum* Jan. ex J. A. & J. H. Schultes fil. in Roemer & Schultes, Syst. Veg. 7:1020 (1830); *A. descendens* auct. non L., e.g. Boiss. Fl. Or. 5:236 (1882); Halacsy, Consp. Fl. Graeciae 3:243 (1904); *A. stojanovii* Kovatchev in Nov. Syst. Pl. Vasc. (Leningrad) 1968:42 ]

Details on the findings:

1. Mk. – v. Nova Breznica (Skopje): Kozjak, 1076 m asl., 02.07.2011 (N 41 53 32.0: E 021 13 26.7) (Leg./Det.: Z. Nikolov)

2. Mk. - Jablanica Mt. (v. Modrič): along the road to the village Modrič, 730 m asl., 21.06.2012 (N 41°22'05.5; E 020°34'43.2) (Leg./Det.: Z. Nikolov)
3. Mk. - Debar: along the r. Crn Drim, between the v. Modrič and v. Lukovo, 500-600 m asl., 22.06.2012 (Leg./Det.: Z. Nikolov)
4. Mk. - Tetovo: 1.5 km NE-E from the railway station "Dolno Orešje", carbonate, 510 m asl., 01.07.2013 (Leg./Det.: A. Teofilovski)
5. Mk. - Osoj: 4.3. km NE from v. Lukovica, locality "Turčin", rocky and bushy places, carbonate, 950 m asl., 28.06.2013 (Leg./Det.: A. Teofilovski)
6. Mk. – Poreče: in the village of Blizansko, grassy place, carbonate, m asl., 09.06.2016 (N41°45'40.98"; E21°9'31.13") (Leg./Det.: A. Teofilovski)
7. Mk. – Struga: near the road between Elen Kamen and Autocamp Livadišta, 700 m asl., 12.06.2017. (N41°7'47.28"; E20°38'23.67") (Leg./Det.: A. Teofilovski)
8. Mk. – Jablanica Mt.: near the road to Debar, in the vicinity of v. Globočica, stony place, carbonate, 700 m.a.s.l., 22.06.2016 (N41°19'31.37"; E20°38'1.98") (Leg./Det.: A. Teofilovski)

Well-developed populations of this species were encountered at the localities Kozjak (v. Nova Breznica, Skopje), Jablanica Mt (v. Modrič), and the valley of the r. Crn Drim, Debar (Fig. 4). Voucher specimens from the vicinity of Tetovo, Osoj, Poreče, Struga and v. Globočica (Crn Drim valley) were collected and determined by Aco Teofilovski (Fig. 4).

Although morphologically distinct, *A. amethystinum* has been often confused with *Allium sphaerocephalon* L. and *Allium guttatum* Steven subsp. *guttatum* (Moris) Stearn (Bothmer, 1972; Anačkov, 2009). The main characteristic of this species is so called "second inflorescence" as a result of different time of flowering and forming the fruits between the lateral and the central flowers, in the same inflorescence (Fig. 1, c, d). There are also other characteristics that make clear distinction between this species, the previously-mentioned two as well as from other, close-related one (Bothmer, 1972).

Morphologically, our plants match those described by Bothmer (1972), Kollman (1984), Stearn (1980), Mathew (1996) (Fig. 1, 2).

The variations of the filament of the outer stamen, mentioned by Bothmer (1972), also appear in some plants from the population in Kozjak, v. N. Breznica (Fig. 3).

The presence of *A. amethystinum* on the territory of the Republic of Macedonia, is one more confirmation to the sub-Mediterranean character of the part of our flora as well as the route of their penetration to this territory. Through the valley of the r. Crn Drim, this species expended its distribution area mostly along the r. Treska.

#### Acknowledgements

I am grateful to Vlado Matevski and Goran Anačkov for their valuable suggestions and comments that improved the earlear draft of the manuscript. Also, I appreciate the contribution by Aco Teofilovski in getting clearer picture of the chorology of this species in our country as well as the donation of the voucher specimens to the Museum.

## ***Allium amethystinum* Tausch, нов вид од васкуларната флора на Република Македонија**

Зоран Николов

Пronоѓањето на *Allium amethystinum* како и на неколку други видови (Matevski, 2017; Teofilovski, 2017; Niketić et al., 2017 и др.) се најдобар доказ дека проучувањето на флората на територијата на Република Македонија, и покрај долгогодишните повеќе или помалку интензивни истражувања, не е завршено.

*A. amethystinum* е медитерански елемент распространет во централниот и источниот дел на Медитеранот (Stearn 1978, 1980; Kollman, 1984; Mathew 1996). Податоци за неговото присуството, на територијата на Република Македонија досега не се регистрирани. Во текот на различните флористички истражувања (1998-2017), а посебно во текот на истражувањата во рамките на проектот „Таксономија и хорологија на родот *Allium* во Република Македонија“ (2012-2014), добро развиени популации од овој вид сретуваме на неколку локалитети: Козјак (с. Нова Брезница), Јабланица (с. Модрич) и по долината на р. Црн Дрим (помеѓу селата Модрич и Луково). Хоролошката слика за распространувањето на овој вид на територијата на Република Македонија ја надополнуваат податоците на Ацо Теофиловски, за следните локалитети: Осој, с. Орешје (Тетово), с. Близанско (Порече), Ливадиште (Струга) и долината на р. Црн Дрим (с. Глобочица).

И покрај јасните морфолошки разлики, *A. amethystinum* често е заменуван со *Allium sphaerocephalon* L. или *Allium guttatum* Steven subsp. *guttatum* (Moris) Stearn. Основната морфолошка карактеристика по која овој вид се разликува од другите блиски видови, е формирањето на т.н. секундарно соцветие, што се јавува како резултат на различното време на цветање, на централните и страничните цветови, во едно исто соцветие.

Во морфолошки поглед, нашите примероци сосема се вклопуваат во дијагнозите на Bothmer (1972), Stearn (1980), Kollman (1984), Mathew (1996). Варијабилноста на филаментот кај надворешните прашници, наведена од Bothmer (1972), се јавува и кај некои наши примероци од локалитетот Козјак (с. Нова Брезница).

Присуството на *A. amethystinum* на територијата на Република Македонија е потврда како на субмедитеранскиот карактер за еден дел од нашата флора, така и за единиот од двата коридора по кој што растенијата продирале на оваа територија. Според регистрираните наоѓалишта би можело да се претпостави дека овој вид својот ареал од долината на р. Црн Дрим (Јадрански слив), го проширил главно по течението на р. Треска.

**Клучни зборови:** *Allium amethystinum*, субмедитеранска флора, Република Македонија

## Chorological data for some new, doubtfully known and rare plants in the flora of the Republic of Macedonia

Aco Teofilovski

Public Enterprise Makedonski šumi, Pero Nakov bb, 1000 Skopje, Republic of Macedonia  
e-mail: [acoteofilovski@hotmail.com](mailto:acoteofilovski@hotmail.com)

### Abstract

*Senecio sylvaticus* is reported as a new species in the flora of Republic of Macedonia while new records are presented for the following 14 doubtfully known or rare taxa: *Carex tomentosa*, *Galeopsis angustifolia*, *Centaurea graeca*, *Centranthus longiflorus* subsp. *junceus*, *Epipactis microphylla*, *Epipactis palustris*, *Eruca vesicaria*, *Gentianella ciliata*, *Isopyrum thalictroides*, *Lathyrus palustris*, *Minuartia juniperina* subsp. *kosaninii*, *Ranunculus auricomus* s.l., *Ranunculus incomparabilis* and *Sanguisorba officinalis*.

**Key words:** distribution, flora, Macedonia, new records, rare taxa, *Senecio sylvaticus*.

### Introduction

The Republic of Macedonia is a small country with a relatively rich vascular flora. Despite the extensive floristic researches lasting more than one and half century new taxa for the vascular flora of this country are continuously discovered with additions of numerous new chorological data for many rare plants as well as confirmations of some doubtfully known ones. In this paper the author presents a part of the results of the floristic investigations carried out during the last several years in different parts of the country territory.

### Material and methods

During the fieldwork representative specimens were collected and photographed. They were labelled with the specific data regarding the location (including GPS coordinates), habitat and state of the populations. The collected material was herbarized according to the standard methods and stored in the personal herbarium of the author. Identification was performed according to the relevant standard floras as well as some monographic works (Tutin & al. 1964-1980, etc.). Previously known chorological data for each of the taxa are presented on a base of relevant literature regarding the flora of Macedonia. The distribution of 13 taxa in Macedonia is presented on relief maps.

### Results and discussion

#### *Carex tomentosa* L. (Figs. 1, 6)

Mt Galičica – above Ljubaništa village, 1200 m, 40° 54'18.60"N, 20°47'36.84"E, shrubby places, limestone, 19.8.2016, leg. A. Teofilovski.

This is a first confirmation of this species in the flora of Macedonia after period of almost nine decades. The only earlier report for this species in Macedonia refers to "Petrina - St. Petka" (Malý 1931), a locality situated most probably near Velgošti village, in N part of Mt Galičica, 25 km north from the newly discovered locality near Ljubaništa village.

#### *Centaurea graeca* Griseb.

Mt Jablanica – 1.3 km NW from Lukovo village, roadside, 870 m, 41°21'23.09"N, 20°35'42.66"E, 28.6.2016, leg. A. Teofilovski; Mt Jablanica – 2.7 km SW from Oktisi village, stony place, limestone, 1130 m, 41° 12'42.20"N, 20°35'14.56"E, 17.7.2017, leg. A. Teofilovski; Mt Jablanica (foothills) – coastal area between Kališta village and Elen Kamen, rocky and stony places, limestone, 700 - 730 m, 41° 8'9.51"N, 20°38'43.74"E, 22.6.2016, observ. A. Teofilovski (photog.); Mt Kožuf – Mrežičko village, near the road to Majdan, stony place, limestone, 530 m, 41°12'12.50"N, 21°58'56.72"E, 23.6.2015, leg. A. Teofilovski.

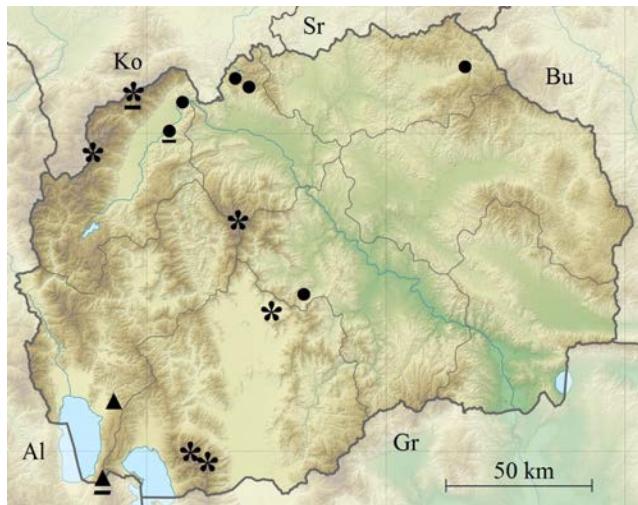

Figure 1. Distribution of *Carex tomentosa* (▲), *Isopyrum thalictroides* (●) and *Ranunculus incomparabilis* (\*) in Macedonia. The underlined symbols are new records.

These are the first reports of this S Balkan endemic from Mt Jablanica and mountain massif Kožuf - Nidže, but otherwise well-known from several areas in S & C parts of Macedonia, northward to Zelenikovo, eastward to Mt Blasica and westward to the west coast of Prespa Lake (Bornmüller 1926, Soška 1941, Rudski 1943, Micevski 1970). The range of this species also includes mainland of Greece (Dimopoulos & al. 2013), two localities in SE Albania - southern coast of Ohrid Lake (Bornmüller 1926) and the west coast of Prespa Lake (Barina & al. 2017), and SW Kosovo - Mt Paštrik (Gajić 1977).

***Centranthus longiflorus* subsp. *junceus* (Boiss. & Heldr.) I. Richardson (Figs. 2, 7)**

Mt Šar Planina - Vejce village, Dupen Kamen, limestone screes, 1640 - 1830 m, 42°4'28.89"N, 20°56'38.47"E, 10.7.2018, leg. A. Teofilovski.

This is a S Balkan endemic subspecies and the only representative of *C. longiflorus* in the flora of Macedonia. Previously it was known only from three close between each other sites in the NW parts of the country: Gorna Radika (Grebenščikov 1937, sub *C. juncea* Boiss. & Heldr.), Mt Korab – Dlaboka Reka (Micevski 1973, sub *C. juncea*) and Koža (Rizovski 1984, sub *C. juncea*).

***Epipactis microphylla* (Ehrh.) Sw. (Figs. 4, 8)**

Mt Šar Planina – 1.9 km SE-S from mountain lodge Ljuboten, beech forest, limestone, 1440 m, 42°10'13.33"N, 21°8'25.08"E, 5.8.2017, leg. A. Teofilovski; Mt Karadžica –

Oča river valley, 0.7 km NW-W from mountain lodge Selište, stony place, limestone, 1020 m, 41°45'32.00"N, 21°15'16.27"E, 7.6.2014, leg. A. Teofilovski; Mt Jablanica – near the road to Lakavica village, 1150 m, 41°18'8.39"N, 20°34'16.76"E, 30.6.2016, leg. A. Teofilovski; Mt Jablanica – 1.4 km N from Sveti Ilja, beech forest, 1600 m, 41°19'54.49"N, 20°32'16.27"E, 17.8.2016, leg. A. Teofilovski; Mt Plačkovica - S from Laki village, deciduous forest, 1050 m, 18.6.2018, observ. A. Teofilovski (photo.).

The previous reports of this species are: Mt Kožuf (Adžibarica) (Vandas 1909), Mt Galičica (Golem Osoj) (Em 1986), Mt Suva Gora (Sedlarevo, Lopušnik) and Kičevo (Studenčica) (Teofilovski 2011). Although it is already known from several localities in different mountain regions, according to the author's observation this species still should be considered a very rare in Macedonian flora, since populations are usually represented with only few individuals.

***Epipactis palustris* (L.) Crantz (Fig. 2)**

Mt Jablanica – 1.0 km W from Lakavica village, 1370 m, marshy place, 41°19'28.11"N, 20°31'12.16"E, 13.7.2016, leg. A. Teofilovski; Mt Jablanica – near the road 1,0 km W from Gorna Belica village, 1540 m, wet place, 15.7.2017, observ. A. Teofilovski; Mt Šar Planina – 4 km W-SW from Bozovce village, marshy place, 1550 m, 42°2'1.78"N, 20°47'15.32"E, 2.9.2017, leg. A. Teofilovski; Kratovo – 1.7 km SE, damp place near the local water reservoir, 770 m, 42°4'6.88"N, 22°11'40.15"E, 26.6.2017, leg. A. Teofilovski, B. Micevski; Mt Ogražden – 7.0 km NE from Drvoš village, marshy place, 1420 m, 41°32'4.94"N, 22°50'33.25"E, 23.7.2016, leg. A. Teofilovski, B. Micevski.

This is the only species of the genus *Epipactis* L. in Europe occurring on damp and marshy habitats. For a long time, the only locality in Macedonia where it has been known to occur was Mavrovsko Pole (Em 1957) and only recently it was reported also on Mt Suva Gora (Lukovica) (Matevski & Teofilovski 2004).

***Eruca vesicaria* (L.) Cav. (Fig. 3)**

Tetovo – in front of the municipality building, 42°0'23.49"N, 20°58'26.29"E, 7.5.2018, leg. A. Teofilovski.

Only few specimens were observed growing between decorative shrubs in the central part of city of Tetovo. This species was included in the "Flora of the Republic of Macedonia" (Micevski 1995) only on a base of following rather old literature data, without any recent field confir-

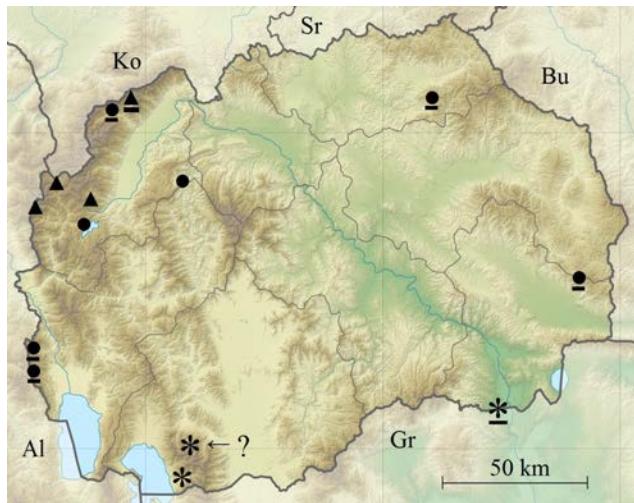

Figure 2. Distribution of *Centranthus longiflorus* subsp. *junceus* (▲), *Epipactis palustris* (●) and *Galeopsis angustifolia* (\*) in Macedonia. The underlined symbols are new records.

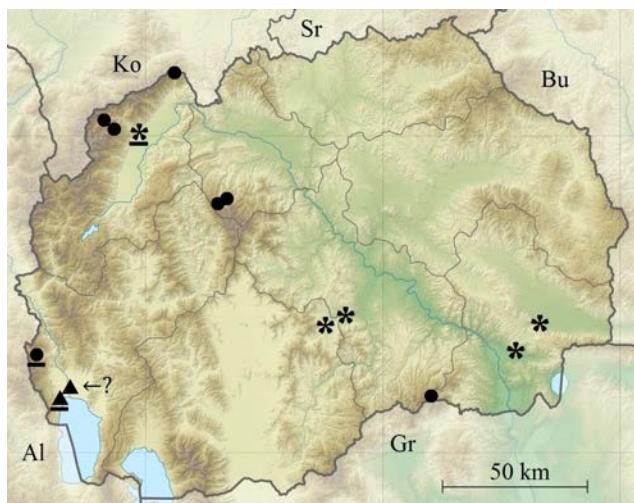

Figure 3. Distribution of *Eruca vesicaria* (\*), *Gentianella ciliata* (●) and *Lathyrus palustris* (▲) in Macedonia. The underlined symbols are new records.

mation: Drenovo gorge (Jurišić 1923, sub *E. sativa* Mill.), Valandovo (Kajali), Prilep (Trojaci) (Stojanoff 1928, sub *E. sativa*) and Strumica (Rudski 1943, sub *E. sativa*). Marhold (2011) considers this species in Macedonia alien with unknown status, which, according to the present knowledge, seems to be an acceptable remark. Among the neighbouring countries it is not known from Serbia, Kosovo and Albania while in Bulgaria and Greece it is considered native (Kuzmanov 1970, Dimopoulos & al. 2013).

#### *Galeopsis angustifolia* Ehrh. ex Hoffm. (Figs. 2, 9 a,b)

Gevgelija - train station, on the railway track, 41° 8'42.22"N, 22°30'42.80"E, 16.8.2018, leg. A. Teofilovski.

Only one exemplar was found growing at the stony layer of the railway track but the largest part of the locality has been not checked. From the territory of Macedonia this species was known by two rather old reports that were not recently confirmed: Resen - Brajčino village (Dimitrov 1908) and Pelister [Todorovski 1963, sub *G. ladanum* var. *angustifolia* (Hoffm.) Gaud.]. The later report seems doubtful since the author in his following work (Todorovski 1967) reported for the same locality *G. ladanum* s.l. that could be interpreted as a correction of the previous identification.

The range of *G. angustifolia* comprises much of C, W and S Europe and Morocco, but as introduced species it occurs also in Ireland and Sweden (World Checklist of Selected Plant Families 2010). On the territory of Balkan Peninsula this is a rare species but known from all countries excluding European part of Turkey (World Checklist of Selected Plant Families 2010). Within the countries neighboring Macedonia, it is known from a single locality on Albanian Alps in Albania (Barina & al. 2017), a single and doubtful locality Nestos River gorge in NE Greece (Dimopoulos 2013) and Predbalkan and Black Sea coast regions in Bulgaria (Asenov 1989), while in Serbia (incl. Kosovo) it is considered "widespread but less frequent than *G. ladanum*" (Diklić 1974).

*G. angustifolia* is closely related to *G. ladanum* L., which has more frequent occurrence in Macedonia and differs mainly in its patent indumentum of the calyx and broader leafs.

#### *Gentianella ciliata* (L.) Borkh. (Fig. 3)

Mt Jablanica – N Slopes of Strižak, pastures on limestone, 1750 m, 41°17'49.75"N, 20°32'12.00"E, 2.9.2016, leg. A. Teofilovski.

This species was known only from three mountains regions: Mt Kožuf (Momina Čuka) (Vandas 1909), Mt Šar Planina (Popova Šapka, Elak, Lešnica, Ljuboten) and Mt Karadžica (Rada Planina, Patiška Reka) (Matevski 2010).

#### *Isopyrum thalictroides* L. (Fig. 1)

Mt Žeden (foothills) - Siričino village, near the road to Tudence village, between oak trees, 42° 1'6.85"N, 21° 5'55.08"E, 21.4.2015, leg. A. Teofilovski.

This is a very rare early flowering species in Macedonian flora which presence was not confirmed in the treatment of the family Ranunculaceae in "The flora of SR Macedonia" (Micevski 1985). In this treatment it was included on a base only of literature data for Kriva

Palanka (Urumov 1922) and Mt Skopska Crna Gora (Grupče 1958) with addition of a personal information of H. Em for two localities - Žeden gorge and Mt Baba (An – Abdi paša). In the cited work the report from Kosovo part of Mt Šar Planina (Kačanik) (Bornmüller 1925) was incorrectly related to the territory of Macedonia.

#### *Lathyrus palustris* L. (Fig. 3)

Struga – Kališta marsh, in a dense stands of *Carex* sp., 41° 9'39.36"N, 20°38'57.24"E, 13.6.2017, leg. A. Teofilovski.

This species was previously known only from the “former Struga marsh” (Micevski 2001), which is nowadays almost completely drained and transformed into an agricultural land and thus most probably it no longer exists there. Therefore, Kališta marsh that actually represents an adjacent part of the former Struga marsh, is the only locality in Macedonia where the current occurrence of this species is confirmed. Unfortunately, the recorded small population is highly endangered due to the intensive drainage and construction activities in the recent years.

#### *Minuartia juniperina* subsp. *kosaninii* Stevanović & Kamari (Figs. 4, 10)

Mt Šar Planina - Bistrica River valley, Dobra Strana, rocks cervices, 1950 m, 42°7'38.87"N, 20°58'25.79"E, 19.7.2018, leg. A. Teofilovski.

This is a steno endemic chasmophyte restricted to Macedonian part of Mt Šar Planina. It was previously known only from the locus classicus – Brezjanski Kuli (Kamari & Stevanović 1996), a nearby rocky ridge between Lesočka and Bistrica rivers.

#### *Ranunculus auricomus* s.l.

Mt Maleševski Planini - NE-E from Smilanci village, forest clearing with *Pteridium aquilinum*, 1300 m, 41° 43'37.60"N, 22°40'49.19"E, 25.4.2017, leg. A. Teofilovski.

*Ranunculus auricomus* s.l. is an Eurasian polyploid complex of hundreds of apomictic and several sexual species, described mostly from Scandinavia and Central Europe. In Balkan Peninsula this complex is quite poorly known in terms of the modern taxonomy. In Macedonia (as well as Albania) the only known member of this complex was the SW Balkan endemic *R. degenii* Kümmerle & Jáv. known from few mountain areas in W

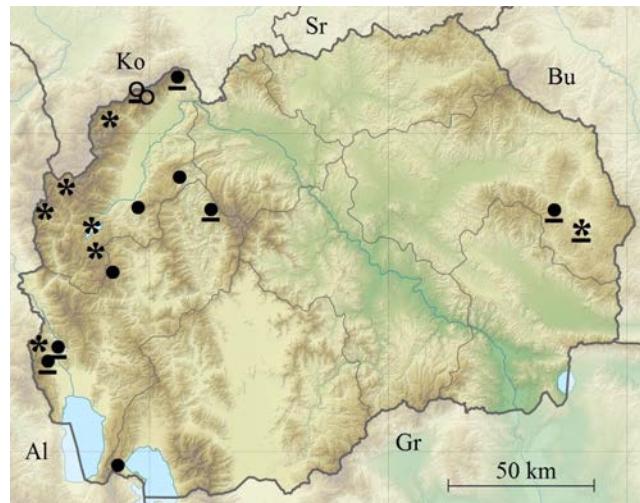

Figure 4. Distribution of *Epipactis microphylla* (●), *Minuartia juniperina* subsp. *kosaninii* (○) and *Sanguisorba officinalis* (\*) in Macedonia. The underlined symbols are new records.

& NW parts of the country: Mts Šar Planina, Korab and Dešat (Micevski 1985, Barina & al. 2017). The population from Mt Maleševski Planini does not belong to *R. degenii* and is therefore to be considered a second representative of *R. auricomus* complex in the flora of Macedonia which identification needs further studies.

#### *Ranunculus incomparabilis* Janka (Fig. 1)

Mt Šar Planina – Bistrica River, Smik, wet place near a siliceous rock, 1615 m, 42°07'17.66" N, 20°50'42.47" E, 18.6.2018, leg. A. Teofilovski.

So far there are only few reported localities of this species in Macedonia: Mt Šar Planina (Bogovinjska River) (Ade 1954), Mt Baba (Bukovo Planina) (Adamović 1904), Mt Baba (Pelister), Mt Jakupica and Prilep (near Treskavec) (Micevski 1985).

#### *Sanguisorba officinalis* L. (Fig. 4)

Mt Maleševski Planini - 3.1 km SW of village of Ratovo, damp meadow, 920 m, 41°39'11.73"N, 22°49'42.43"E, 22.7.2016, leg. A. Teofilovski, B. Micevski.

This is the first record of this species from the eastern part of Macedonia, though well-known from the following localities in the west and north-west parts: Mt Šar Planina, Lukovo Pole, Mavrovsko Pole, Mt Bistra, Mt Korab and Mt Jablanica (Micevski 1998).

#### *Senecio sylvaticus* L. (Fig. 5, 11a,b)

Struga – 1.2 km NE-N from Brčovo village, deforested place, 820 m, 41°18'30.36"N, 20°40'26.04"E,

30.8.2018, leg. A. Teofilovski; Kruševo – near the forest roads SW from Pusta Reka village, 1200 - 1520 m, 41° 23'40.85"N, 21° 8'15.22"E, 15.9.2018, leg. A. Teofilovski; Kruševo – near the forest roads 2.0 km NW-W from Vrboec village, 1000 m, 41°20'20.43"N, 21°16'19.67"E, 3.10.2018, leg. A. Teofilovski.

This is a new species for the flora of the Republic of Macedonia.

**Description.** Erect annual up to 70 cm, with sulcate stem and ascending branches, usually somewhat flocose, glandular-hairy at least in inflorescence but not viscid. Leaves irregularly pinnatifid; basal and lower cauline leaves oblanceolate in outline, shortly petiolate; middle and upper oblong in outline, auriculate-amplexicaul. Capitula numerous, 4-6 mm in diameter, in a large terminal corymb. Involucral bracts 7-10 mm, concolorous or slightly dark-tipped, glandular-hairy; supplementary bracts 2 or 3, 1-2 mm. Ligules 8-15, very short and revolute immediately after anthesis, yellow. Achenes c. 2-5 mm, rather sparsely subappressed-hairy. (Chater & Walters 1976)

The closest representative of the genus *Senecio* L. in the flora of Macedonia is *S. vulgaris* L., widely distributed on disturbed habitats and waste places throughout entire territory of the country. It clearly differs from *S. sylvaticus* in lacking glandular hairs, having 8-10 supplementary bracts of the involucre that are usually black-tipped, etc.

On the newly recorded localities this species generally grows on freshly deforested habitats. As a pioneer species it settles deforested areas shortly (within 1-2 year) after

the logging or construction of the forest roads. On the locality near Struga several tents of individuals were observed on a small freshly deforested place in an oak forest complex while on the localities near Kruševo this species occurs very abundantly in the belt of beech forests growing near recently constructed forest roads as well as on recently deforested areas along them. On the later localities this species is usually accompanied by following plants, mostly typically pioneer species: *Epilobium angustifolium*, *E. montanum*, *Erigeron canadensis*, *Galeopsis cf. tetrahit*, *Hieracium murorum*, *H. racemosum*, *Lactuca muralis*, *L. viminea*, *Luzula luzuloides*, *Rubus hirtus* agg., *R. idaeus*, *Sonchus oleraceus*, *Veronica officinalis*, etc.

*Senecio sylvaticus* is distributed in most of Europe, growing mostly on forest margins and disturbed ground, especially on sandy soil (Chater & Walters 1976), while introduced in S Africa, N & S America, Hawaii, Hong Kong, Australia, New Zealand, and some parts of E Europe (see Robinson & al., Greuter 2006+). This species is known in all Balkan countries with an exception of Albania (Greuter 2006+, Barina & al. 2017). Within the neighbouring countries of Macedonia it is most widely distributed in Bulgaria, occurring through the whole country though rather rarely and sporadically (Vladimirov 2012), while in Greece it is known only from NE part (Dimopoulos & al. 2013) and in Serbia only from two localities - Majdanpek (E Serbia) and Banja Koviljača (W Serbia) (Gajić 1975).

In relation to the new records, the closest previously known localities are situated more than 160 km northwest in Montenegro and 180 km east in SW Bulgaria and NE Greece. Therefore, the discovery of this species on the territory of W & C Macedonia is of noticeable phytogeographic importance, extending its area of distribution deep toward SW part of Balkan Peninsula.

## Conclusions

*Senecio sylvaticus* is recorded for the first time in the flora of Macedonia. The new records near Struga and Kruševo extend its distribution area toward SW part of the Balkan Peninsula, with the closest known localities being situated more than 160 km northwest in Montenegro and 180 km east in SW Bulgaria and NE Greece.

The second but still unidentified representative of *Ranunculus auricomus* s.l. in the flora of Macedonia is reported from Mt Maleševski Planini.

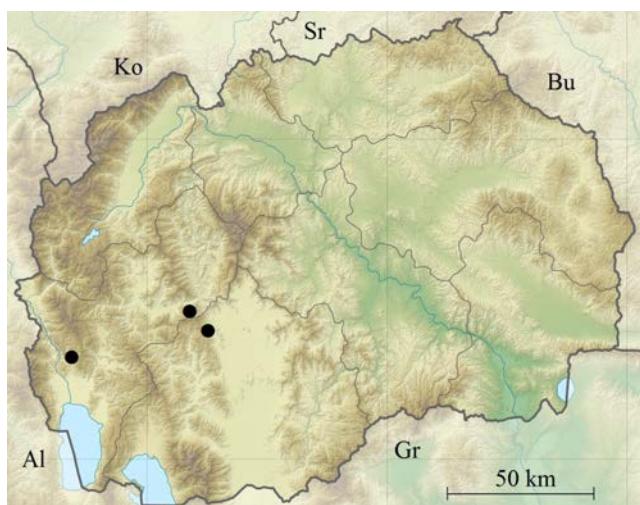

Figure 5. First records of *Senecio sylvaticus* in Macedonia (●).

*Carex tomentosa* was rediscovered on the territory of Macedonia after almost eight decades on a new locality on Mt Galičica.

The doubtful presence of *Galeopsis angustifolia* in the flora of Macedonia is confirmed with a first record in Gevgelija.

Figure 6. *Carex tomentosa* (inflorescence) (photo A. Teofilovski).

Figure 7. *Centranthus longiflorus* subsp. *junceus* (photo A. Teofilovski).

Figure 8. *Epipactis microphylla* (photo A. Teofilovski).

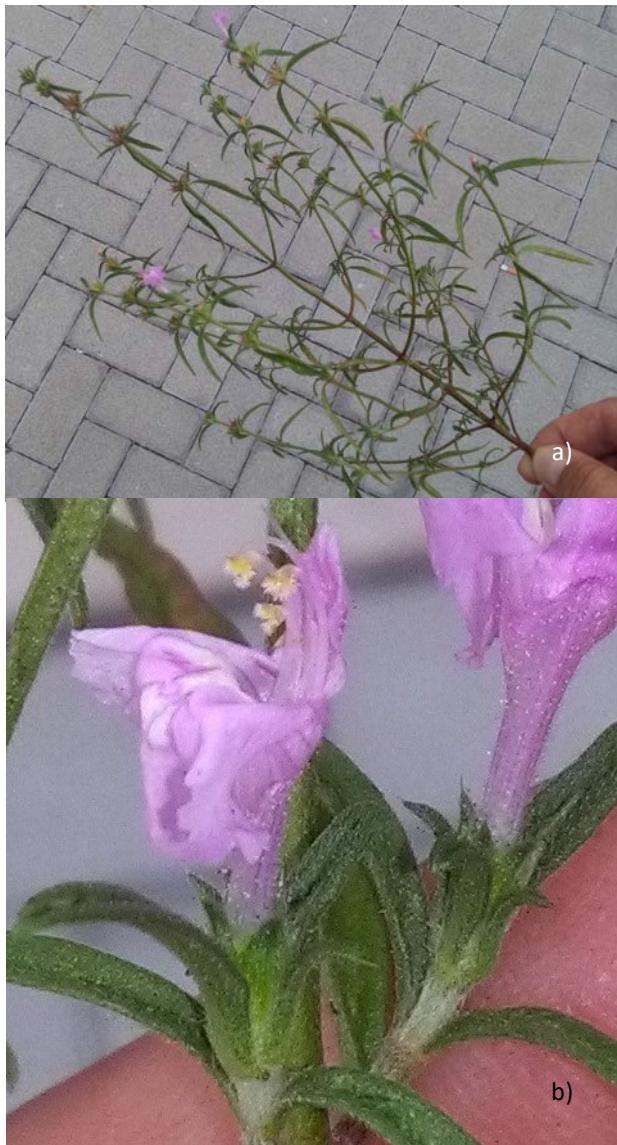

Figure 9. *Galeopsis angustifolia* a. whole plant, b. flower (photo A. Teofilovski).

Figure 10. *Minuartia juniperina* subsp. *kosaninii* (photo A. Teofilovski).

Figure 11. *Senecio sylvaticus* a. whole plant, b. flowering capitulas (photo A. Teofilovski)

The actual presence of *Lathyrus palustris* on the territory of Macedonia is confirmed with a first record in Kališta marsh.

The first record of *Eruca vesicaria* in Tetovo confirms the presence of this species in the flora of Macedonia.

One or more new localities are reported for the following nine rare species or subspecies: *Centaurea graeca*, *Centranthus longiflorus* subsp. *junceus*, *Epipactis microphylla*, *Epipactis palustris*, *Gentianella ciliata*, *Isopyrum thalictroides*, *Minuartia juniperina* subsp. *kosaninii*, *Ranunculus incomparabilis* and *Sanguisorba officinalis*.

### Abstract

The interest in macrofungal studies in Macedonia has been growing in the past 20 years. The data sources used are published data, exsiccatae and notes from our own studies, as well as specimens from other collectors. According to the research conducted up to now, a total of 1,735 species, 27 varieties and 4 forms of Basidiomycota have been recorded in the country. A large part of this data is a result of the field and taxonomic work in the last two decades. This paper includes 497 taxa new to Macedonia.

**Key words:** fungi, Macedonian macrofungi diversity, nomenclature, taxonomy.

### Introduction

From a mycological perspective, the Republic of Macedonia has been studied reasonably well. A number of publications have been made by foreign mycologists, who predominantly visited the country only once or studied the material delivered to them by others, such as Litschauer (1939), Petrak (1936), Pilát (1936-42), Sydow (1921). Among Yugoslav mycologists, Ranđević (1909, 1938) and Lindtner (1943) provided some data on fungi in Macedonia, primarily microfungi. The pivotal Lindtner's papers on macrofungi of Macedonia are those written together with Pilát (1938, 1939). Nonetheless, the chief contribution to the research into Macedonian mycobiota was made by Tortić (1967-1988), who published, alone or with co-authors, many papers as part of her research in this country. Milica Tortić was the first to have conducted systematic studies on the mycobiota of different areas (Pelister and Jakupica Mts.). In 1988 she published first contribution to the mycobiota of Macedonia (Tortić 1988), where her research was summarised and covered 585 species of "higher" fungi. Furthermore, a number of phytopathologists - Minev, Tomashevik, Grujoska, Serafimovski, Papazov, Koleva-Shekutkovska and Sotirovski studied saprobe and parasitic fungi along with the diseases they cause. In the later period of time, until 2000, in an

array of regions in Macedonia, such as Pelister, Jakupica, Galichica, Golem Grad Island, Kozuf, Shar Planina and South Povardarie, mainly lignicolous species of fungi were studied (Tortić 1988; Karadelev 1993, 1995c, d; Karadelev, Rusevska 2000; Karadelev et al. 2002a, b, d, 2003a).

Systematic research on fungi was particularly intensified after 2000, upon the establishment of the Mycological Laboratory (at the Institute of Biology, Faculty of Natural Science and Mathematics, Ss Cyril and Methodius University, Skopje). Ever since then, in this specialised laboratory, collection and identification of mycological material have been performed by the mycologists-in-charge (Dr. Mitko Karadelev and Dr. Katerina Rusevska), accompanied by graduate, master and PhD students. Owing to the research of the last two decades, a more comprehensive notion has been gained as regards mycodiversity of several regions in the country (Vodno, Bistra, Dobra Voda, Jablanica, Mavrovo, Osogovo Mountains, Ograzden, Shar Planina, etc.) or a variety of systematic categories (principally, macrofungi; e.g. *Amanita*, *Ganoderma*, *Hymenochaete*, *Hyphoderma*, *Peniophora*, *Phellinus*, boletoid, gasteroid, hypogeous and hallucinogenic fungi, morels etc.). All listed species belonging to the phylum Basidiomycota, while myxomycetes, oomycetes, zygomycetes, rusts and smut fungi are insufficiently studied yet.

The Mycological Laboratory houses the national collection of fungi of Macedonia, officially registered as the Macedonian Collection of Fungi (MCF), which contains approximately 25,000 specimens and it is constantly updated. It primarily comprises macrofungi specimens from Macedonia but also from other countries. The basic data about each and every specimen are input into the database (MACFUNGI), which includes around 37,000 data records, largely from Macedonia but also from different countries.

### Material and methods

The data sources used are as follows: published data, exsiccatae and notes from our own studies, the Macedonian Collection of Fungi (MCF), the database (MACFUNGI), as well as specimens from other collectors. The determination of the species was performed during the field research and in the Mycological Laboratory of the Institute of Biology at the Faculty of Natural Science in Skopje, microscopically, by help of using reagents (Melzers reagent, KOH, Cotton blue, Congo Red, sulphovanillin etc.). Certain species were identified while still in a fresh condition, and the others were identified during further laboratory analyses. Part of the samples was preserved and deposited in MCF, while all indispensable data about the species were stored in the MACFUNGI database. The species names follow Index Fungorum (Kirk, 2018) and/or MycoBank (Stalpers and Cock, 2018). The species are reported in alphabetical order. Basic data on localities, habitat type, substrate, and collection dates are included for all taxa new to Macedonia. All collections of new taxa for Macedonia are stored in MCF.

### Results and discussion

Presented checklist (Annex 1) establishes the current knowledge of the diversity of all known up to now Basidiomycota taxa in the Republic of Macedonia. The phylum Basidiomycota is the most diverse and the largest taxonomic category in *Fungi* with approximately 31,500 known taxa (Kirk et al. 2008). Compared to larger ascomycetes (257 known species) it is more explored fungal group in Macedonia, with total number of 1735 registered species, 27 varieties and 4 forms up to now. The checklist includes taxa documented from existing

literature; data from field research trips, examined exsiccates from the Macedonian Collection of fungi and data from the MACFUNGI database. A majority of the listed basidiomycetes belong to the following families: Russulaceae, Cortinariaceae, Mycenaceae, Tricholomataceae, Entolomataceae, Inocybaceae, etc. The most abundant genus is *Cortinarius* with 122 species, followed by *Russula* (88), *Mycena* (56), *Lactarius* (51), *Entoloma* (44), *Tricholoma* (43), *Inocybe* (39), *Amanita* (38) and *Hygrophorus* represented by 26 species. Among the taxa listed, 497 are reported for the first time for the country (486 species, 9 varieties and 2 forms). Regarding their trophic affiliation, most of the recorded species have been registered as humicolous, lignicolous and plant debris saprobes, parasites, as well as mycorrhizal species. To date, 195 basidiomycetes are categorized in the Macedonian Red List of Fungi (Karadelev and Rusevska 2013). The majority data for the basidiomycetes in Macedonia are from the following mountains: Belasica, Bistra, Galichica, Karadzhica, Kozhuf, Mavrovo NP, Pelister, Shar Planina, Skopska Crna Gora, etc. Current biogeographical data and many records of apparently rare and noteworthy species indicate that the diversity of basidiomycetes in Macedonia is still incompletely known and demonstrates the need for a research in a greater depth.

### Conclusions

On the basis of prior mycological research in Macedonia, including a period of two decades intensively work, 1,766 taxa of basidiomycete in total, have been recorded thus far. One third, i.e. 497 taxa are presented here as new to Macedonia. Among them there are 9 varieties and 2 forms. Different geographical regions and various type of habitats in Macedonia were studied. Rare and endangered species found during this period contribute to the preparation of the Macedonian Red List of Fungi, where 195 species belong to Basidiomycota.

### Acknowledgements

First and foremost, the authors are indebted to all graduated students with diploma work in the field of mycology, as well as all current and past, MSc and PhD students from the Institute of Biology, who have been

instrumental in compilation of the current macrofungal checklist by collection and species identification of fungal material, as well as providing laboratory assistance. A great debt of gratitude is also owed to the Faculty of Natural Science in Skopje for its continuous support of our scientific efforts. Our special thanks go to the NGOs (Macedonian Mycological Society, Biology Students' Research Society and Macedonian Ecological Society) and all domestic and international funding authorities and donors, who have donated to the Mycological Laboratory or financed our mycological research projects over the years. We would like also to express our gratitude to Dr. Matthias Theiß and Tome Jovanovski for their great contribution in collecting and documenting of fungi material.

Two anonymous reviewers greatly improved an earlier draft of the manuscript.

## Листа на видови макрофунги од типот Basidiomycota во Република Македонија

Митко Караделев, Катерина Русевска, Герхард Кост и Данијела Митиќ-Копања

Истражувањата на габите во Македонија датираат од почетокот на минатиот век, а се особено интензивирани во последните дваесетина години. Првиот миколошки труд на подрачјето на Македонија е од Ранојевиќ (1909). Sydow (1921) ги обработува габите што во Македонија ги собира Bornmüller. Од посебна важност се трудовите на Lindtner, кој се занимава со проучување на микромицетите, но исто така собирал и макромицети кои се делумно објавени (Pilat and Lindtner 1938, 1939). Милица Тортиќ ги започнува првите подетални миколошките истражувања во Македонија, како резултат на што во 1988 година ја издава првата микофлора на Македонија во која се опфатени 585 вида макромицети.

Во понатамошниот период до 2000 година се истражувани главно лигниколни видови габи во одделни региони од Македонија, како: Пелистер, Јакупица, Галичица, островот Голем Град, Кожуф, Шар Планина и Јужно Повардарие.

Систематските истражувања на габите се интензивирани особено од 2000 година, со основањето на Миколошката лабораторија (при Институт за биологија, ПМФ, УКИМ, Скопје). Со истражувањата од последните две децении има појасна слика за микодиверзитетот на повеќе региони во земјата (Водно, Бистра, Добра Вода, Јабланица, Маврово, Осоговски Планини, Огражден, Шар Планина и др.) или за одредени систематски категории (главно макромицети, како на пример: *Amanita*, *Ganoderma*, *Hymenochaete*, *Hypnoderma*, *Peniophora*, *Phellinus*, болетоидни, гастериоидни, подземни и халуциногени габи, смрчки и други). Врз база на досегашните истражувања во Македонија е утврдено присуство на 1766 таксони макромицети од типот Basidiomycota, од кои 497 таксони (486 видови, 9 вариетети и 2 форми) претставуваат први наоди за Македонија. Слузавите габи, оомицетите, зигомицетите, 'рѓите и гламните сè уште се недоволно истражени.

Исто така, со отворањето на Миколошката лабораторија е формирана и единствената национална збирка на габи во Македонија, официјално регистрирана како Macedonian Collection of Fungi (MCF), во која се сместени околу 25000 примероци, и која постојано се дополнува. Во неа се наоѓаат главно примероци од макромицети од Македонија и од други држави. Најзначајните податоци за секој примерок се внесуваат во базата на податоци (MAK FUNGI), која брои околу 37000 податоци, главно од Македонија, но и од различни држави.

**Клучни зборови:** габи, диверзитет на македонските макрофунги, номенклатура, таксономија.

**ANNEX 1. The checklist of macrofungal Basidiomycota in the Republic of Macedonia**

969. *Lepiota ignivolvata* Bousset & Joss. ex Joss.

Skopska Crna Gora Mt.: *Querco-Capinetum orientalis*, soil, 06.10.1998; Bistra Mt.: *Quercetum frainetto-cerris*

- soil, 14.10.2006; Golem Grad Island: *Pruno webbii-Juniperetum excelsae*, soil, 10.2008; Belasica Mt.: beech forest, leaf litter, 03.11.2010; Plachkovica Mt.: beech forest, soil, 06.10.2014; Maleshevski Planini Mt.: beech forest, soil, 07.10.2015.
970. *Lepiota magnispora* Murrill.  
Syn. *Lepiota ventriosospora* D.A. Reid  
References: Karadelev and Rusevska 2000; Karadelev et al. 2003a; Karadelev and Murati 2008.
971. *Lepiota oreadiformis* Velen.  
References: Karadelev and Rusevska 2013.
972. *Lepiota pallida* Locq. ex Bon & Candusso  
Bogdanci: meadow, soil, 28.04.2002.
973. *Lepiota pyrochroa* Malençon  
Kumanovo (vicinity): riparian vegetation, soil, 25.10.2005.
974. *Lepiota subgracilis* Kühner  
Syn. *Lepiota kuehneriana* Locq.  
References: Karadelev et al. 2003a.
975. *Lepiota subincarnata* J.E. Lange  
Syn. *Lepiota josserandii* Bon & Boiffard  
References: Rusevska and Karadelev 2004.
976. *Lepista flaccida* (Sowerby) Pat.  
Syn. *Clitocybe flaccida* (Sowerby) P. Kumm.  
Syn. *Clitocybe inversa* (Scop.) Quél.  
Syn. *Lepista inversa* (Scop.) Pat.  
References: Karadelev and Rusevska 2000; Karadelev et al. 2003a; Karadelev and Murati 2008.
977. *Lepista irina* (Fr.) H. E. Bigelow  
Kavadarci (vicinity): oak forest, soil, 12.10.2008; Kozhuf Mt.: pasture, soil, 12.06.2005; Mavrovo NP: *Fago-Abietetum meridionale*, soil, 11.10.2010.
978. *Lepista luscina* (Fr.) Singer  
Syn. *Melanoleuca luscina* (Fr.) Métrod.  
References: Karadelev and Savova 1995; Karadelev et al. 2003a; Bauer-Petrovska et al. 2006, 2008c; Karadelev and Murati 2008.
979. *Lepista nuda* (Bull.) Cooke  
References: Tortić and Cekova 1975; Tortić 1988; Karadelev 2001a; Karadelev and Popovski 1995; Karadelev et al. 2004a, 2008d, 2008g; Rusevska and Karadelev 2004; Bauer-Petrovska et al. 2006, 2008c; Karadelev and Murati 2008.
980. *Lepista personata* (Fr.) Cooke  
References: Karadelev 2001a.
981. *Lepista ricekii* Bon  
Kichevo (vicinity): *Pinus* plantings, soil, 05.05.2009.
982. *Lepista rickenii* Singer  
Syn. *Tricholoma rickenii* (Singer) Pilát  
References: Karadelev and Savova 1995; Bauer-Petrovska et al. 2006, 2008c.
983. *Lepista sordida* (Schumach.) Singer  
References: Rusevska and Karadelev 2004.
984. *Leptoporus mollis* (Pers.) Quél.  
Suva Gora Mt.: oak forest with pine plantings, *Pinus sylvestris* (fallen trunk), 12.10.2011.
985. *Leptosporomyces galzinii* (Bourdot) Jülich  
References: Tortić 1987; Karadelev 1993, 1995c, 1999a, 1999b, 2000a; Karadelev and Rusevska 2000; Karadelev et al. 2003a.
986. *Leptosporomyces mutabilis* (Bres.) Krieglst.  
Syn. *Fibulomyces mutabilis* (Bres.) Jülich  
Bistra Mt.: *Abieti-Fagetum*, *Abies* (fallen branch), 30.04.2018.
987. *Leratiomyces ceres* (Cooke & Massee) Spooner & Bridge  
Syn. *Stropharia aurantiaca* (Cooke) M. Imai  
Golem Grad Island: *Pruno webbii-Juniperetum excelsae*, soil, 17.10.2008.
988. *Leratiomyces squamosus* (Pers.) Bridge & Spooner  
Syn. *Stropharia squamosa* (Pers.) Quél.  
References: Karadelev 1993, 1995c, 2000d; Karadelev and Rusevska 2000; Karadelev et al. 2008a; Karadelev and Murati 2008.
989. *Leucoagaricus barssii* (Zeller) Vellinga  
Syn. *Leucoagaricus macrorhizus* Locq. ex E. Horak  
References: Rusevska and Karadelev 2004.

990. *Leucoagaricus cinerascens* (Quél.) Bon & Boiffard  
Veles (vicinity): *Querco-Carpinetum orientalis*, soil, 07.10.2002.
991. *Leucoagaricus leucothites* (Vittad.) Wasser  
Syn. *Lepiota naucina* Fr.  
References: Karadelev et al. 2008d.
992. *Leucoagaricus meleagris* (Sowerby) Singer  
Syn. *Agaricus meleagris* Sowerby  
Demir Kapija: Greek juniper forest, soil, 19.11.2003.
993. *Leucoagaricus serenus* (Fr.) Bon & Boiffard  
Syn. *Sericomyces serenus* (Fr.) Heinem.  
Golem Grad Island, *Biaro tenuifolii-Juniperetum excelsae*, soil, 20.10.2014.
994. *Leucocoprinus badhamii* (Berk. & Broome)  
Locq.  
Syn. *Leucoagaricus badhamii* (Berk. & Broome) Singer  
References: Karadelev et al. 2004.
995. *Leucocoprinus birnbaumii* (Corda) Singer  
References: Karadelev and Rusevska 2016b.
996. *Leucocoprinus cretaceus* (Bull.) Locq.  
Syn. *Leucoagaricus cretaceus* M.M. Moser  
References: Karadelev and Rusevska 2004.
997. *Leucocortinarius bulbiger* (Alb. & Schwein) Singer  
References: Karadelev and Rusevska 2000, 2013; Karadelev et al. 2003a, 2008a; Rusevska and Karadelev 2004.
998. *Leucogyrophana pseudomollusca* (Parmasto)  
Parmasto  
Pelister Mt.: molika pine forest, *Pinus peuce* (rotten wood), 13.10.2011; Dobra Voda Mt.: *Pinus* plantings, *Pinus sylvestris* (rotten wood) 13.11.2012; Skopje: pine plantings, *Pinus nigra* (rotten wood), 21.10.2006; Berovo: wood in constructions, beams, 20.09.2012, 06.01.2013.
999. *Leucopaxillus albissimus* (Peck) Singer  
Pelister Mt.: molika pine forest mixed with *Fagus* and *Abies*, soil, 19.10.2005.
1000. *Leucopaxillus gentianaeus* (Quél.) Kotl.  
Syn. *Leucopaxillus amarus* (Alb. & Schwein.) Kühner  
References: Karadelev and Popovski 1995; Karadelev et al. 2003a, 2008g; Karadelev and Rusevska 2004.
1001. *Leucopaxillus giganteus* (Sowerby) Singer  
References: Karadelev and Popovski 1995; Rusevska and Karadelev 2004; Bauer-Petrovska et al. 2006, 2008c; Karadelev and Rusevska 2013.
1002. *Leucopaxillus leptooides* (Maire) Singer  
References: Karadelev and Rusevska 2013, 2016b.
1003. *Leucopaxillus pinicola* J. Favre  
Pelister Mt.: *Digitali viridiflorae-Pinetum peuces*, soil, 19.10.2005.
1004. *Leucopaxillus tricolor* (Peck) Kühner  
Syn. *Leucopaxillus compactus* (P. Karst.) Neuhoff  
References: Karadelev and Rusevska 2013.
1005. *Lichenomphalia grisella* (P. Karst.) Redhead  
Syn. *Omphalina grisella* (Weinm.) M.M. Moser  
Matka: meadow, soil, 26.10.2005.
1006. *Lichenomphalia hudsoniana* (H.S. Jenn.) Redhead, Lutzoni, Moncalvo & Vilgalys  
Syn. *Lichenomphalia alpina* (Britzelm.) Redhead  
Korab Mt.: alpine pasture, among mosses, 04.09.2005.
1007. *Lichenomphalia pararustica* (Clémençon) El-borne  
Syn. *Omphalina pararustica* Clémençon  
Prespa: riparian vegetation, soil, 01.05.2007.
1008. *Limacella illinita* (Fr.) Maire  
Pelister Mt.: *Quercetum frainetto-cerris*, soil, 20.10.2005; pine and larch plantings, soil, 16.10.2008.
1009. *Lindtneria chordulata* (D.P. Rogers) Hjortstam  
References: Karadelev 2000; Ordynets et al. 2018.
1010. *Lindtneria leucobryophila* (Henn.) Jülich  
Syn. *Mycolindtneria leucobryophila* (Henn.) Rauschert  
References: Karadelev 1993; Ordynets et al. 2018.
1011. *Lindtneria trachyspora* (Bourdot & Galzin) Pilát  
Syn. *Mycolindtneria trachyspora* (Bourdot & Galzin) Rauschert

- References: Litschauer 1939; Pilat 1936-42; Karadelev and Rusevska 2013; Ordynets et al. 2018.
1012. *Litschauerella clematitis* (Bourdot & Galzin) J. Erikss. & Ryvarden  
References: Karadelev 1993, 1995c, 1999c, 2000b; Karadelev et al. 2003a; Ordynets et al. 2018.
1013. *Lopharia spadicea* (Pers.) Boidin  
References: Tortić 1988; Tortić and Karadelev 1986; Karadelev 1988, 1989, 1993, 1994, 1995a, 1998; Karadelev et al. 2008d.
1014. *Loreleia postii* (Fr.) Redhead, Moncalvo, Vilgalys & Lutzoni  
Vlaina Planina Mt.: pine plantings, soil, 14.10.2015.
1015. *Lycoperdon atropurpureum* Vittad.  
References: Rusevska and Karadelev 2004.
1016. *Lycoperdon echinatum* Pers.  
References: Pilát and Lindtner 1939; Tortić and Cekova 1975; Tortić 1988; Karadelev 2000d, 2001a; Karadelev and Rusevska 2000; Karadelev et al. 2003a, 2008a, 2008g.
1017. *Lycoperdon lambinonii* Demoulin  
Pelister Mt.: *Festuco heterophyliae-Fagetum*, soil, 20.10.2005.
1018. *Lycoperdon lividum* Pers.  
References: Pilát and Lindtner 1939; Tortić 1988; Karadelev et al. 2004a.
1019. *Lycoperdon mammiforme* Pers.  
References: Tortić and Cekova 1975; Tortić 1988; Perić et al. 2001.
1020. *Lycoperdon marginatum* Vittad.  
Skopska Crna Gora Mt.: oak forest, soil, 11.10.2008; Bistra Mt.: *Calamintho grandiflorae-Fagetum*, soil, 29.09.2013.
1021. *Lycoperdon molle* Pers.  
References: Karadelev et al. 2003a; Rusevska and Karadelev 2004.
1022. *Lycoperdon nigrescens* Wahlenb.  
Syn. *Lycoperdon foetidum* Bonord.  
References: Karadelev et al. 2003a; Karadelev and Rusevska 2004.
1023. *Lycoperdon perlatum* Pers.  
References: Pilát and Lindtner 1939; Tortić and Cekova 1975; Tortić 1988; Nastov et al. 1996; Karadelev 2000d, 2001a; Karadelev et al. 2002b, 2003a, 2003b, 2008a, 2008d, 2008g; Karadelev and Rusevska 2004; Rusevska and Karadelev 2004.
1024. *Lycoperdon pratense* Pers.  
Syn. *Vascellum pratense* (Pers.) Kreisel  
References: Karadelev 2000d; Karadelev et al. 2003b, 2004a, 2008a; Karadelev and Rusevska 2004; Rusevska and Karadelev 2004; Karadelev and Murati 2008; Karadelev and Spasikova 2009.
1025. *Lycoperdon pyriforme* Schaeff.  
References: Tortić and Cekova 1975; Tortić 1988; Karadelev 1993, 1994, 1995b, 2000d; Karadelev and Savova 1995; Nastov et al. 1996; Karadelev et al. 2002a, 2003a, 2008g; Karadelev and Rusevska 2002; Rusevska and Karadelev 2004; Bauer-Petrovska et al. 2006, 2008c.
1026. *Lycoperdon umbrinum* Pers.  
References: Pilát and Lindtner 1939; Tortić 1988.
1027. *Lyomyces crustosus* (Pers.) P. Karst.  
Syn. *Hyphodontia crustosa* (Pers.) J. Erikss.  
Syn. *Xyloodon crustosus* (Pers.) Chevall.  
References: Pilát and Lindtner 1938; Tortić and Karadelev 1986; Tortić 1988; Karadelev 1993, 1994; Karadelev et al. 2004b, 2008g; Rusevska and Karadelev 2004; Irbe et al. 2008; Ordynets et al. 2018.
1028. *Lyomyces juniperi* (Bourdot & Galzin) Riebesehl & E. Langer  
Syn. *Xyloodon juniperi* (Bourdot & Galzin) Hjortstam & Ryvarden  
Syn. *Hyphodontia juniperi* (Bourdot & Galzin) J. Erikss. & Hjortstam  
References: Tortić 1988; Karadelev 1988, 1993, 1994, 1998, 2000c, 2001a, 2001b; Ordynets et al. 2018.
1029. *Lyomyces pruni* (Lasch) Riebesehl & E. Langer  
Syn. *Xyloodon pruni* (Lasch) Hjortstam & Ryvarden  
Syn. *Hyphodontia pruni* (Lasch) Svrcek  
References: Karadelev 1999c, 2000b; Rusevska and Karadelev 2004.
1030. *Lyophyllum atratum* (Fr.) Singer  
Syn. *Tephrocybe atrata* (Fr.) Donk.  
Reference: Karadelev and Rusevska 2013.

1031. *Lyophyllum connatum* (Schumacher) Singer  
Maleshevski Planini Mt.: beech forest, soil, 14.10.2015.  
References: Karadelev 2000d, Karadelev and Rusevska 2004; Karadelev and Murati 2008.
1032. *Lyophyllum decastes* (Fr.) Singer  
References: Karadelev et al. 2002b, 2003a.
1033. *Lyophyllum eucalypticum* (A. Pearson) M. M. Moser  
Skopje (vicinity): deciduous forest, soil, 05.09.2002.
1034. *Lyophyllum fumosum* (Pers.) P. D. Orton  
References: Karadelev et al. 2003a.
1035. *Lyophyllum immundum* (Berk.) Kühner  
References: Karadelev et al. 2007a.
1036. *Lyophyllum infumatum* (Bres.) Kuhner  
References: Karadelev et al. 2003a.
1037. *Lyophyllum loricatum* (Fr.) Kühner ex Kalamees  
Skopje: park, soil, 15.10.1972; Skopska Crna Gora Mt.: riparian vegetation, soil (under *Alnus*), 24.10.2010; Bistra Mt.: soil, 04.11.2012.
1038. *Lyophyllum murinum* (Batsch) M.M. Moser  
Syn. *Tephrocybe murina* (Batsch) M.M. Moser  
Reference: Karadelev et al. 2003a.
1039. *Lyophyllum ozes* (Fr.) Singer  
Bistra Mt.: deciduous forest, soil, 04.11.2012.
1040. *Lyophyllum paenichroum* Clémenton  
Skopje (vicinity): deciduous forest (*Quercus*, *Carpinus*, *Buxus*), soil, 26.10.2005.
1041. *Lyophyllum rancidum* (Fr.) Singer  
Syn. *Tephrocybe rancida* (Fr.) Donk  
Belasica Mt.: riparian vegetation, soil, 02.11.2010
1042. *Lyophyllum transforme* (Sacc.) Singer  
References: Karadelev and Rusevska 2013.
- M**
1043. *Macrocytidia cucumis* (Pers.) Joss.  
References: Karadelev and Rusevska 2000; Karadelev et al. 2003a.
1044. *Macrolepiota excoriata* (Schaeff.) Wasser  
Syn. *Macrolepiota heimii* (Locq.) Bon
1045. *Macrolepiota mastoidea* (Fr.) Singer.  
Syn. *Macrolepiota gracilenta* (Krombh.) Wasser.  
Syn. *Macrolepiota konradii* (Huijsman ex P.D. Orton) M.M. Moser.  
References: Karadelev 2000d, 2001a; Karadelev and Rusevska 2004; Karadelev et al. 2003a, 2008d.

1065. ***Melanoleuca cinerascens*** D. A. Reid.

Skopje (vicinity): oak forest, soil, 27.10.2005.

1066. ***Melanoleuca cognata*** (Fr.) Konrad & Maubl.

References: Rusevska and Karadelev 2004.

1067. ***Melanoleuca excissa*** (Fr.) Singer.

Syn. *Melanoleuca kuehneri* Bon.

References: Karadelev et al. 2003a, 2008d.

1068. ***Melanoleuca graminicola*** (Velen.) Kühner & Maire.

References: Karadelev and Rusevska 2000; Karadelev et al. 2003a; Karadelev and Murati 2008.

1069. ***Melanoleuca grammopodia*** (Bull.) Fayod

Jakupica Mt.: *Calamintho grandiflorae-Fagetum*, soil, 11.07.1999.

1070. ***Melanoleuca heterocystidiosa*** (Bon & Bellù) Bon

Golem Grad Island: *Pruno webbii-Juniperetum excelsae*, soil, 17.10.2008.

1071. ***Melanoleuca humilis*** (Pers.) Pat.

Pelister Mt.: mixed forest, soil, 26.10.2004.

1072. ***Melanoleuca melaleuca*** (Pers.) Murrill.

Bogdanci: pine plantings, soil, 20.10.1989; Skopje (vicinity): mixed deciduous forest, soil, 29.05.2004; Taorska Klisura and Badar: meadow, soil, 17.04.2013; Plachkovica Mt.: beech forest, soil, 06.10.2014; Karabalijsa: Dub, *Orno-Quercetum petraeae*, soil, 11.10.2014; Skopska Crna Gora Mt.: oak forest, soil, 12.10.2014; Debarca: meadow, soil, 19.10.2014; Skopje: park, soil, 05.12.2014.

1073. ***Melanoleuca microcephala*** (P. Karst.) Singer.

Demir Kapija: Greek juniper forest (with *Quercus coccifera*); soil, 19.11.2003.

1074. ***Melanoleuca oreina*** (Fr.) Kühner & Maire

References: Pilát and Lindtner 1939; Tortić 1988; Karadelev and Spasikova 2004.

1075. ***Melanoleuca polioleuca*** (Fr.) Kühner & Maire

Plachkovica Mt.: riparian vegetation, soil, 06.10.2014; Debarca: *Carici elongatae-Alnetum glutinosae*, soil, 19.10.2014; Bistra Mt.: riparian vegetation, soil, 16.04.2017.

1076. ***Melanoleuca stridula*** (Fr.) Singer.

References: Karadelev and Murati 2008.

1077. ***Melanoleuca subbrevipes*** Métrod

Pelister Mt.: pasture, soil, 24.04.2002.

1078. ***Melanoleuca subpulverulenta*** (Pers.) Métrod.

References: Karadelev et al. 2003a.

1079. ***Melanoleuca turrita*** (Fr.) Singer.

Pelister Mt.: *Pinus sylvestris* plantings, soil, 09.10.2001.

1080. ***Melanophyllum haematospermum*** (Bull.)

Kreisel

Karadzica Mt.: beech forest, soil, 27.10.2017.

1081. ***Mensularia hastifera*** (Pouzar) T. Wagner & M.

Fisch.

Syn. *Inonotus hastifer* Pouzar

References: Pilát 1937, Tortić and Kotlaba 1976; Karadelev 1993, 1995c; Nastov et al. 1996; Karadelev et al. 2003a.

1082. ***Meripilus giganteus*** (Pers.) P. Karst.

References: Karadelev 1995c.

1083. ***Merismodes anomala*** (Pers.) Singer

Syn. *Cyphellopsis anomala* (Pers.) Donk

References: Pilát and Lindtner 1938.

1084. ***Meruliopsis hirtella*** (Burt) Ginns.

Syn. *Byssomerulius hirtellus* (Burt) Parmasto

References: Pilát and Lindtner 1938; Tortić and Karadelev 1986; Tortić 1988; Karadelev 1993, 1994, 1998, 2000c, 2000e, 2001b; Ordynets et al. 2018.

1085. ***Meruliopsis taxicola*** (Pers.) Bondartsev.

Syn. *Gloeoporus taxicola* (Pers.) Gilb. & Ryvarden

References: Tortić and Karadelev 1986; Tortić 1988; Karadelev 1993, 1995c; Karadelev et al. 2002c, 2008g; Rusevska and Karadelev 2004.

1086. ***Merulius tremellosus*** Schrad.

Syn. *Phlebia tremellosa* (Schrad.) Nakasone & Burds.

References: Tortić and Cekova 1975; Tortić 1982, 1988; Karadelev 1988, 1993, 1995b, 2000d; Karadelev and Savova 1995; Bauer-Petrovska et al. 2006, 2008c; Karadelev et al. 2008g; Ordynets et al. 2018.

1087. ***Metulodontia nivea*** (P. Karst.) Parmasto

References: Pilát and Lindtner 1938; Karadelev 1999b, 2000a; Karadelev and Rusevska 2013.

1088. ***Mutinus caninus*** (Huds.) Fr.

References: Pilát and Lindtner 1939; Tortić 1988; Karadelev 1999b, 2000a; Perić et al. 2001; Karadelev et al. 2008c; Rusevska and Karadelev 2004, 2013.

1089. ***Mycena aetites*** (Fr.) Quél.

Skopska Crna Gora Mt.: oak forest, soil, 12.10.2014.

1090. ***Mycena acicula*** (Schaeff.) P. Kumm.

References: Karadelev et al. 2002a.

1091. ***Mycena alba*** (Bres.) Kühner.

References: Karadelev and Murati 2008.

1092. ***Mycena alcalina*** (Fr.) P. Kumm.

References: Karadelev et al. 2003a.

1093. ***Mycena amicta*** (Fr.) Quél.

References: Karadelev and Rusevska 2000; Karadelev et al. 2003a.

1094. ***Mycena arcangeliana*** Bres.

References: Karadelev and Rusevska 2004; Karadelev et al. 2008a; Karadelev and Murati 2008.

1095. ***Mycena aurantiomarginata*** (Fr.) Quél.

References: Karadelev and Rusevska 2000; Karadelev et al. 2003a; Karadelev and Murati 2008.

1096. ***Mycena bulbosa*** (Cejp) Kühner

Plachkovica Mt.: beech forest, *Fagus* (fallen leaves), 06.10.2014.

1097. ***Mycena capillaripes*** Peck.

References: Karadelev and Rusevska 2000; Karadelev et al. 2003a.

1098. ***Mycena capillaris*** (Schumach.) P. Kumm.

Bistra Mt.: *Festuco heterophyliae-Fagetum*, *Fagus* (fallen leaves), 14.10.2006.

1099. ***Mycena cinerella*** (P. Karst.) P. Karst.

Jasen MPPA: pine forest, soil, 15.10.2010.

1100. ***Mycena clavicularis*** (Fr.) Gillet

References: Karadelev and Rusevska 2000; Karadelev et al. 2003a.

1101. ***Mycena corynephora*** Maas Geest.

Plachkovica Mt.: riparian vegetation, *Salix alba* (bark of living tree), 03.09.2014.

1102. ***Mycena crocata*** (Schrad.) P. Kumm.

References: Karadelev and Popovski 1995; Karadelev 2000d; Karadelev et al. 2008a.

1103. ***Mycena diosma*** Krieglst. & Schwöbel

References: Karadelev et al. 2003a.

1104. ***Mycena epipterygia*** (Scop.) Gray.

References: Nastov et al. 1996; Karadelev and Rusevska 2000; Karadelev et al. 2003a, 2008a; Karadelev and Murati 2008.

1105. ***Mycena erubescens*** Höhn.

Skopska Crna Gora Mt.: oak forest, *Quercus frainetto* (rotten wood), 11.10.2008.

1106. ***Mycena filopes*** (Bull.) P. Kumm.

References: Karadelev et al. 2003a; Karadelev et al. 2008a.

1107. ***Mycena flavescens*** Velen.

References: Rusevska and Karadelev 2004.

1108. ***Mycena flavoalba*** (Fr.) Quél.

References: Karadelev et al. 2003a.

1109. ***Mycena floridula*** (Fr.) P. Karst.

Kozhuf Mt.: pine plantings, soil, 25.10.2007.

1110. ***Mycena galericulata*** (Scop.) Gray.

References: Karadelev 1993, 1995c, 1999a, 2000d; Karadelev and Rusevska 2000; Karadelev et al. 2003a, 2008h; Rusevska and Karadelev 2004; Karadelev and Murati 2008.

1111. ***Mycena galopus*** (Pers.) P. Kumm.

Syn. *Mycena galopoda* (Pers.) P. Kumm.

References: Tortić 1988; Karadelev et al. 2002b; Rusevska and Karadelev 2004.

1112. ***Mycena haematopus*** (Pers.) P. Kumm.

References: Karadelev 2000d.

1113. ***Mycena inclinata*** (Fr.) Quél.

References: Tortić 1988; Karadelev and Popovski 1995; Rusevska and Karadelev 2004.

1114. ***Mycena juniperina*** Aronsen

References: Karadelev and Rusevska 2013, 2016a.

1115. ***Mycena leptocephala*** (Pers.) Gillet

References: Karadelev and Rusevska 2002.

1116. ***Mycena luteovariegata*** Harder & Læssøe

Syn. *Mycena pura* f. *lutea* (Gillet) Arnolds

Skopska Crna Gora Mt.: oak forest, soil, 11.10.2008.

1117. ***Mycena meliigena*** (Berk. & Cooke) Sacc.

References: Karadelev and Murati 2008.

1118. ***Mycena metata*** (Fr.) P. Kumm.

References: Karadelev et al. 2008a.

1119. ***Mycena mirata*** (Peck) Sacc.

Suva Planina Mt.: *Querco-Carpinetum orientalis*, *Quercus pubescens* (bark), 30.10.2010.

1120. ***Mycena mucor*** (Batsch) Quél.

Shar Planina Mt.: *Abieti-Piceetum scardicum*, needle litter, 16.10.2000.

1121. *Mycena niveipes* (Murrill) Murrill

References: Karadelev et al. 2008a.

1122. *Mycena olivaceomarginata* (Massee) Massee.

Prespa: roadsides, soil, in grass, 18.04.2002.

1123. *Mycena pelianthina* (Fr.) Quél.

References: Tortić 1988; Karadelev 2000d; Karadelev et al. 2004a; Rusevska and Karadelev 2004; Karadelev and Murati 2008.

1124. *Mycena polyadelpha* (Lasch) Kühner.

Jakupica Mt.: oak forest, *Quercus frainetto* (fallen leaves), 16.10.2010.

1125. *Mycena polygramma* (Bull.) Gray.

References: Karadelev 2001a; Rusevska and Karadelev 2004; Karadelev et al. 2008d.

1126. *Mycena pseudoalnicola* Singer

Shar Planina Mt.: riparian vegetation, *Alnus glutinosa* (bark), 19.11.2017.

1127. *Mycena pseudoinclinata* A.H. Sm.

Golak Mt.: oak forest, *Quercus frainetto* (fallen leaves), 06.09.2014.

1128. *Mycena pseudocorticola* Kühner.

References: Karadelev et al. 2003a.

1129. *Mycena pseudopicta* (J.E. Lange) Kühner.

Skopje: park, *Pinus nigra* plantings, among fallen needles, 24.10.2007; *Robinia* plantings, soil, 30.10.2007.

1130. *Mycena pterigena* (Fr.) P. Kumm.

References: Karadelev et al. 2003a.

1273. ***Phlebiopsis gigantea*** (Fr.) Jülich  
References: Tortić 1988; Karadelev 1993, 1995c, 1999a; Karadelev and Rusevska 2000; Karadelev et al. 2003a; Ordynets et al. 2018.
1274. ***Phlebiopsis ravenelii*** (Cooke) Hjortstam  
Syn. *Phlebiopsis roumeguerei* (Bres.) Jülich & Stalpers  
References: Pilát and Lindtner 1938; Tortić and Karadelev 1986; Tortić 1988; Karadelev 1993, 1994; Ordynets et al. 2018.
1275. ***Phloeoemana hiemalis*** (Osbeck) Redhead  
Syn. *Mycena hiemalis* (Osbeck) Quél.  
References: Karadelev et al. 2008a.
1276. ***Phloeoemana speirea*** (Fr.) Redhead  
Syn. *Mycena speirea*(Fr.) Gillet.  
Shar Planina Mt.: mixed deciduous forest, twigs, 14.06.2007.
1277. ***Pholiota adiposa*** (Batsch) P. Kumm.  
Syn. *Pholiota aurivella* (Batsch) P. Kumm.  
References: Karadelev 1993, Karadelev et al. 2003a; Karadelev and Rusevska 2004.
1278. ***Pholiota alnicola*** (Fr.) Singer  
Syn. *Flammula alnicola* (Fr.) P. Kumm.  
Skopje: park, *Acer pseudoplatanus* (planted), base of tree, 20.06.2011.
1279. ***Pholiota cerifera*** (P. Karst) P. Karst  
Galichica Mt.: beech forest, *Fagus* (rotten wood), 04.11.2008; Osogovski Planini Mt.: beech forest, living *Fagus*, 20.10.2007; *Festuco heterophyliae-Fagetum*, *Fagus* (rotten wood), 29.10.2014; Veles-Gradsko: riparian vegetation, *Populus tremula* (rotten wood), 25.11.2014; Shar Planina Mt.: beech forest, *Fagus* (rotten wood), 23.09.2018.
1280. ***Pholiota conissans*** (Fr.) Kuyper & Tjall.-Beuk.  
Prespa: *Salicetum albae-fragilis*, soil, 10.11.2008.
1281. ***Pholiota flammans*** (Batsch) P. Kumm.  
Plachkovica Mt.: beech forest, *Fagus* (rotten wood), 06.10.2014; Maleshevski Planini Mt.: beech forest, *Fagus* (rotten wood), 07.10.2015.
1282. ***Pholiota fulvella*** (Peck) A.H. Sm. & Hesler  
References: Pilát and Lindtner 1939; Tortić 1988; Karadelev and Spasikova 2004.
1283. ***Pholiota gummosa*** (Lasch) Singer  
Pelister Mt.: meadow, soil, 20.10.2005.
1284. ***Pholiota highlandensis*** (Peck) Quadr. & Lunghini  
Syn. *Pholiota carbonaria* A.H. Sm.  
References: Rusevska and Karadelev 2016b.
1285. ***Pholiota jahnii*** Tjallingii-Beukers & Bas  
Mavrovo NP: deciduous forest, soil, 09.10.2009.
1286. ***Pholiota lenta*** (Pers.) Singer  
References: Karadelev et al. 2003a.

1287. ***Pholiota limonella*** (Peck) Sacc.

References: Pilát and Lindtner 1939; Tortić 1988; Karadelev and Spasikova 2004.

1288. ***Pholiota lubrica*** (Pers.) Singer

References: Rusevska and Karadelev 2004.

1289. ***Pholiota mixta*** (Fr.) Kuyper & Tjall.-Beuk

Skopje: park, *Cupressus* and *Pinus* planting, soil, 19.02.2018.

1290. ***Pholiota populnea*** (Pers.) Kuyper & Tjall.-Beuk.

References: Rusevska and Karadelev 2016b.

1291. ***Pholiota scamba*** (Fr.) M. M. Moser

Bistra Mt.: *Abieti-Fagetum*, soil, 18.10.2005; Pelister Mt.: *Digitali viridiflorae-Pinetum peuces*, soil, 19.10.2005.

1292. ***Pholiota squarrosa*** (Oeder) P. Kumm.

References: Karadelev 2000d, Karadelev et al. 2003a, 2004a; Karadelev et al. 2008g.

1293. ***Pholiotina aporos*** (Kits van Wav.) Cléménçon

References: Karadelev and Murati 2008.

1294. ***Pholiotina brunnea*** (J.E. Lange & Kühner ex Watling) Singer

Pelister Mt.: *Digitali viridiflorae - Pinetum peuces*, soil, 23.09.2002.

1295. ***Pholiotina pygmaeoaffinis*** (Fr.) Singer

Syn. *Conocybe pygmaeoaffinis* (Fr.) Kühner

Prespa: meadow, soil, 19.04.2002.

1296. ***Pholiotina rugosa*** (Peck) Singer

Syn. *Conocybe filaris* (Fr.) Kühner

Syn. *Pholiotina filaris* (Fr.) Sing.

References: Karadelev et al. 2008h.

1297. ***Phyllotopsis nidulans*** (Pers.) Singer

References: Pilát and Lindtner 1939; Tortić 1988; Karadelev and Spasikova 2004; Karadelev et al. 2007a; Karadelev and Rusevska 2013.

1298. ***Phytoconis ericetorum*** (Pers.) Redhead & Kuyper

Syn. *Omphalina ericetorum* (Pers.) M. Lange

References: Karadelev et al. 2003a.

1299. ***Piloderma byssinum*** (P. Karst.) Jülich

References: Karadelev 1993, 1995c, 1999a, 1999c, 2000b, 2000e, 2001b; Karadelev and Rusevska 2000; Karadelev et al. 2003a; Ordynets et al. 2018.

1300. ***Piloderma fallax*** (Lib.) Stalpers

Syn. *Piloderma croceum* J. Erikss. & Hjortstam

Syn. *Piloderma bicolor* (Peck) Jülich

References: Karadelev 1993; Ordynets et al. 2018.

1301. ***Piptoporus betulinus*** (Bull.) P. Karst.

References: Karadelev 1993, 1995b, 1995c; Karadelev and Savova 1995; Karadelev et al. 2002; Bauer-Petrovska et al. 2006, 2008c; Ordynets et al. 2018.

1302. ***Pisolithus arhizus*** (Scop.) Rauschert

References: Tortić 1988; Karadelev et al. 2003a, 2003b, 2008c; Karadelev and Rusevska 2004, 2013; Rusevska et al. 2015.

1303. ***Pisolithus capsulifer*** (Sowerby) Watling

References: Rusevska et al. 2015.

1304. ***Pisolithus tinctorius*** (Pers.) Coker & Couch

References: Rusevska et al. 2015.

1305. ***Pleurocybella porrigens*** (Pers.) Singer

References: Karadelev 1999b, 2000a.

1306. ***Pleurotus cornucopiae*** (Paulet) Rolland

References: Karadelev et al. 2008d; Karadelev and Rusevska 2013.

1307. ***Pleurotus dryinus*** (Pers.) P. Kumm.

References: Karadelev 1993, 1999b, 2000; Karadelev and Murati 2008.

1308. ***Pleurotus eryngii*** (DC.) Quél.

References: Karadelev 2001a; Rusevska and Karadelev 2004; Bauer-Petrovska et al. 2008a, 2008b; Karadelev et al. 2008d; Karadelev and Rusevska 2013.

1309. ***Pleurotus ostreatus*** (Jacq.) P. Kumm.

References: Pilát and Lindtner 1939; Serafimovski et al. 1968; Grujoska 1970; Tortić and Cekova 1975; Tortić and Karadelev 1986; Tortić 1988; Karadelev 1988, 1993, 1994, 1995b, 2000d, 2001a; Karadelev and Savova 1995; Karadelev et al. 2002a, 2008d, 2008g; Karadelev and Rusevska 2004; Karadelev and Spasikova 2004; Bauer-Petrovska et al. 2006, 2008c.

1310. *Pleurotus pulmonarius* (Fr.) Quél.  
References: Karadelev 1993, 1995c, 2000d, 2001a; Karadelev et al. 2002c; Karadelev and Rusevska 2004; Karadelev and Murati 2008.
1311. *Plicatura nivea* (Fr.) P. Karst.  
References: Ordynets et al. 2018.
1312. *Plicaturopsis crispa* (Pers.) D. A. Reid  
Syn. *Plicatura crispa* (Pers.) Rea  
References: Pilát and Lindtner 1938; Tortić 1988; Karadelev 1993, 1995c; Karadelev and Rusevska 2000; Ordynets et al. 2018.
1313. *Pluteus atromarginatus* (Korn.) Kühn.  
References: Karadelev 1993, 1995c, 1999a; Karadelev and Rusevska 2000; Karadelev et al. 2003a.
1314. *Pluteus brunneoradiatus* Bonnard  
Skopska Crna Gora Mt.: degraded oak forest, planted walnut (stump), 21.10.2004.
1315. *Pluteus cinereofuscus* J.E. Lange  
Slan Dol: poplar forest, soil, 04.12.2014; Vodno Mt.: mixed deciduous forest, soil, 01.07.2015.
1316. *Pluteus cervinus* (Schaeff.) P. Kumm.  
Syn. *Pluteus atricapillus* (Batsch) Fayod  
References: Pilát and Lindtner 1939; Tortić and Cekova 1975; Tortić 1988; Karadelev and Spasikova 2004, 2009; Karadelev 1993, 1995c, 2000d; Karadelev et al. 2002b, 2003, 2008d, 2008g; Karadelev and Rusevska 2002; Karadelev and Spasikova 2004b; Rusevska and Karadelev 2004.
1317. *Pluteus dietrichii* Bres.  
Dobra Voda Mt.: *Quercetum frainetto-cerris*, woody debris, 09.06.2009.
1318. *Pluteus ephebeus* (Fr.) Gillet  
Bogdanci: deciduous forest, rotten wood, 28.04.2002; Maleshevski Planini Mt.: beech forest, *Fagus* (rotten wood), 07.10.2015.
1319. *Pluteus exiguum* (Pat.) Sacc.  
References: Irbe et al. 2008.
1320. *Pluteus hispidulus* (Fr.) Gillet  
References: Pilát and Lindtner 1939; Tortić 1988.
1321. *Pluteus leoninus* (Schaeff.) P. Kumm.  
Kozhuf Mt.: mixed forest (*Quercus*, *Pinus*, *Carpinus*), *Pinus nigra* (dead wood), 14.10.2008; Shar Planina Mt.: *Fago-Abietetum*, *Abies* (stump), 16.07.2009.
1322. *Pluteus luctuosus* Boud.  
Maleshevski Planini Mt.: beech forest, *Fagus* (rotten wood), 07.10.2015.
1323. *Pluteus nanus* (Pers.) P. Kumm.  
Skopska Crna Gora Mt.: oak forest, woody debris, 11.10.2008.
1324. *Pluteus petasatus* (Fr.) Gillet  
Bistra Mt.: oak forest, *Quercus cerris* (rotten wood), 15.10.2006; Skopje (vicinity): mixed deciduous forest, *Betula pendula* (rotten wood), 04.09.2009; Skopje: park, soil, among sawdust, 09.06.2009.
1325. *Pluteus phlebophorus* (Dimar) P. Kumm.  
References: Pilát and Lindtner 1939; Tortić 1988; Karadelev and Spasikova 2004.

References: Karadelev et al. 2007a.
1327. *Pluteus salicinus* (Pers.) P. Kumm.  
References: Tortić 1988; Karadelev et al. 2004a, 2004b, 2008g; Karadelev and Spasikova 2004a, 2004b, 2009.
1328. *Pluteus semibulbosus* (Lasch) Gillet  
Galichica Mt.: *Querco-Carpinetum orientalis*, soil, 01.10.2002.
1329. *Pluteus thomsonii* (Berk. & Broome) Dennis  
Mavrovo NP: *Quercetum frainetto-cerris*, *Quercus cerris* (rotten wood), Skopje (vicinity): oak forest, woody debris, 26.05.2018; Karadzica Mt.: beech forest, woody debris, 24.09.2018.
1330. *Podosomes trogii* (Fr.) Pouzar  
Syn. *Ischnoderma trogii* (Fr.) Donk  
References: Karadelev and Rusevska 2013.
1331. *Polyporus arcularius* (Batsch) Fr.  
References: Tortić and Karadelev 1986; Tortić 1988; Karadelev 1993, 1994, 2000d; Karadelev et al. 2008a, 2008d, 2008h; Rusevska and Karadelev 2004; Ordynets et al. 2018.

1332. ***Polyporus badius*** (Pers.) Schwein.

Syn. *Royoporus badius* (Pers.) A.B. De

References: Karadelev 1993.

Syn. *Phellinus vorax* (Harkn.) Cerný

References: Grujoska 1972; Karadelev 1993; Karadelev and Rusevska 2000; Karadelev et al. 2003a, 2008b; Ordynets et al. 2018.

1333. ***Polyporus brumalis*** (Pers.) Fr.

References: Tortić and Cekova 1975; Karadelev 1993, 1994; Karadelev and Murati 2008; Ordynets et al. 2018.

1343. ***Porotheleum fimbriatum*** (Pers.) Fr.

Syn. *Stromatoscypha fimbriata* (Pers.) Donk

References: Pilát and Lindtner 1938; Tortić 1988; Karadelev 1993, 1994; Karadelev et al. 2004a.

1334. ***Polyporus ciliatus*** Fr.

References: Karadelev 1993, 1994; Ordynets et al. 2018.

1344. ***Porphyrellus porphyrosporus*** (Fr. & Hök) E.-J. Gilbert

Syn. *Porphyrellus pseudoscaber* Secr. ex Singer

References: Karadelev 2000d, Karadelev and Rusevska 2013.

1335. ***Polyporus melanopus*** (Pers.) Fr.

References: Pilát and Lindtner 1938; Tortić 1988; Karadelev et al. 2004a, 2003a.

1345. ***Porostereum spadiceum*** (Pers.) Hjortstam &

Ryvarden

References: Karadelev 1999b, 2000a; Ordynets et al. 2018.

1336. ***Polyporus mori*** (Pollini) Fr.

References: Karadelev 1993, 1994; Karadelev et al. 2002c, 2008g.

1346. ***Postia balsamea*** (Peck) Jülich

References: Karadelev 2000e, 2001b; Ordynets et al. 2018.

1337. ***Polyporus rhizophilus*** Pat.

Skopska Crna Gora Mt.: meadow, soil, 24.04.2006; 01.05.2006.

1347. ***Postia caesia*** (Schrad.) P. Karst.

Syn. *Oligoporus caesius* (Schrad.) Gilb. & Ryvarden

Syn. *Tyromyces caesius* (Schrad.) Murrill

References: Karadelev 1993, 1995c, Karadelev and Rusevska 2000; Karadelev et al. 2003a.

1348. ***Postia fragilis*** (Fr.) Jülich

Syn. *Oligoporus fragilis* (Fr.) Gilb. & Ryvarden

References: Karadelev 1993, 1995c, 1999a; Karadelev and Rusevska 2000; Karadelev et al. 2003a; Ordynets et al. 2018.

1349. ***Postia rennyi*** (Berk. & Broome) Rajchenb.

Syn. *Oligoporus rennyi* (Berk. & Broome) Donk

Skopje: park, planted *Pinus sylvestris*, (decayed wood), 27.04.2018.

1350. ***Postia stiptica*** (Pers.) Jülich

Syn. *Oligoporus stipticus* (Pers.) Gilb. & Ryvarden

Syn. *Tyromyces stipticus* (Pers.) Kotl. & Pouzar

References: Karadelev et al. 2003a; Ordynets et al. 2018.

1339. ***Polyporus tuberaster*** (Jacq. ex Pers.) Fr.

References: Ordynets et al. 2018.

1351. ***Postia subcaesia*** (A. David) Jülich

Syn. *Tyromyces subcaesius* A. David

- Syn. *Oligoporus subcaesius* (A. David) Ryvarden & Gilb.  
References: Karadelev et al. 2008a; Ordynets et al. 2018.
1352. ***Postia tephroleuca*** (Fr.) Jülich  
Syn. *Tyromyces tephroleucus* (Fr.) Donk  
Syn. *Oligoporus tephroleucus* (Fries) Gilbertson & Ryvarden  
References: Pilát 1936-42; Pilát and Lindtner 1938; Karadelev 1993, 1999c; 2000b.
1353. ***Protomerulius caryae*** (Schwein.) Ryvarden  
Syn. *Aporpium caryae* (Schwein.) Teixeira & D.P. Rogers  
References: Karadelev 1993.
1354. ***Protostropharia semiglobata*** (Batsch) Redhead, Moncalvo & Vilgalys  
Syn. *Stropharia semiglobata* (Batsch.) Quél.  
References: Karadelev and Rusevska 2000; Karadelev 2001a; Karadelev et al. 2002a, 2002b, 2003a, 2004a, 2008a, 2008h; Karadelev and Murati 2008.
1355. ***Psathyrella artemisiae*** (Pass.) Konrad & Maubl.  
Skopska Crna Gora Mt.: *Querco-Carpinetum orientalis*, soil, 25.09.2005.
1356. ***Psathyrella bipellis*** (Quél.) A.H. Sm.  
Skopska Crna Gora Mt.: *Quercetum frainetto-cerris*, soil, 11.10.2008; Taorska Klisura and Badar: riparian vegetation, soil, 11.05.2013.
1357. ***Psathyrella candolleana*** (Fr.) Maire  
References: Tortić 1988; Karadelev et al. 2004a, 2004b, 2008a, 2008h; Karadelev and Spasikova 2004b, 2009; Karadelev and Murati 2008.
1358. ***Psathyrella conopilus*** (Fr.) A. Pearson & Dennis  
Osogovski Planini Mt.: *Festuco heterophyllae-Fagetum*, soil, 29.10.2014; Slan Dol: riparian vegetation, soil, among leaves litter, 23.12.2014.
1359. ***Psathyrella corrugis*** (Pers.) Konrad & Maubl.  
Syn. *Psathyrella polycystis* (Romagn.) Kits van Wav.  
Mavrovo NP: beech forest, soil, 02.10.2010.
1360. ***Psathyrella fatua*** (Fr.) Konrad & Maubl.  
Skopje (vicinity): fallow land with *Verbascum*, *Eryngium*, soil, 18.03.2018; 25.03.2018.
1361. ***Psathyrella fusca*** (J.E. Lange) A. Pearson  
Syn. *Psathyrella tephrophylla* (Romagn.) M.M. Moser  
Prespa: *Quercetum frainetto-cerris*, soil, 21.09.2003; Taorska Klisura and Badar: riparian vegetation, soil, 23.11.2003, 25.11.2014; Skopje (vicinity): oak forest, soil, 22.05.2004; park, soil, 26.12.2012; Galichica Mt.: *Quercetum trojanae*, soil, 09.11.2003; Osogovski Planini Mt.: beech forest, soil, 16.10.2007; Skopska Crna Gora Mt.: oak forest, soil, 11.10.2008; Slan Dol: riparian vegetation, soil, 04.12.2014.
1362. ***Psathyrella marcescibilis*** (Britzelm.) Singer  
Syn. *Coprinopsis marcescibilis* (Britzelm.) Örstadius & E. Larss.  
Karadzhica Mt.: *Abieti-Fagetum*, soil, 29.05.2011; Skopje: park, soil, among grass, 13.10.2013; Slan Dol: riparian vegetation, soil, 23.12.2014; Taorska Klisura and Badar, riparian vegetation, soil, 14.03.2018.
1363. ***Psathyrella multipedata*** (Peck) A.H. Sm.  
References: Karadelev and Murati 2008.
1364. ***Psathyrella murcida*** (Fr.) Kits van Wav.  
Skopska Crna Gora Mt.: roadsides, soil, 11.10.2008; Jasen MPPA: pine forest (buried), soil, 14.10.2010; Kumanovo (vicinity): riparian vegetation, soil, 17.04.2011; Maleshevski Planini Mt.: oak forest, *Quercus frainetto* (rotten wood), 19.09.2014.
1365. ***Psathyrella ochracea*** (Romagn.) Kits van Wav.  
Jablanica Mt.: *Ostrya* forest, soil, 14.07.2006; Pelister Mt.: mixed forest, soil, 18.10.2004; Skopska Crna Gora Mt.: meadow, soil, 11.10.2008; Taorska Klisura and Badar: deciduous forest (*Quercus*, *Carpinus*), soil, 21.04.2012.
1366. ***Psathyrella panaeoloides*** (Maire) M.M. Moser  
Skopska Crna Gora Mt.: at roadsides, soil, 02.10.2005.
1367. ***Psathyrella piluliformis*** (Bull.) P.D. Orton  
Syn. *Psathyrella hydrophila* (Bull.) Maire  
References: Pilát and Lindtner 1939; Tortić 1988; Karadelev and Spasikova 2004.
1368. ***Psathyrella pseudogracilis*** (Romagn.) M.M. Moser  
Slan Dol: riparian vegetation (*Populus*, *Salix*), soil, 04.12.2014.

1369. ***Psathyrella prona*** (Fr.) Gillet  
Plachkovica Mt.: beech forest, soil, 21.10.2014; Taorska Klisura and Badar: riparian vegetation, soil, 17.04.2013; 11.05.2013; Slan Dol: riparian vegetation (*Populus, Salix*), *Populus* (stump), 23.12.2014.
1370. ***Psathyrella prona*** f.*albidula* (M.M. Moser) Kits van Wav.  
Syn. *Psathyrella albidula* (Romagn.) M.M. Moser  
Pelister Mt.: meadow, soil, 09.10.2001.
1371. ***Psathyrella spadiceogrisea*** (Schaeff.) Maire  
Pelister Mt.: *Festuco heterophyliae-Fagetum*, soil, 26.05.2002; Kitka Mt.: beech forest, soil, 03.05.2007; Kumanovo (vicinity): riparian vegetation, soil, 17.04.2011; Kriva Palanka (vicinity): meadow, soil, 19.05.2011; Karadzhica Mt.: *Abieti-Fagetum*, soil, 29.05.2011; Taorska Klisura and Badar: riparian vegetation, soil, 17.04.2013; 11.05.2013.
1372. ***Psathyrella sphagnicola*** (Maire) J. Favre  
Shar Planina Mt.: peat bog, among *Sphagnum*, 24.08.2011.
1373. ***Psathyrella subcernua*** (Schulzer) Singer  
Karadzhica Mt.: *Abieti-Fagetum, Fagus* (rotten wood), 29.05.2011; meadow, soil, 25.09.2011.
1374. ***Pseudobaeospora pillodii*** (Quél.) Wasser  
Syn. *Pseudobaeospora oligophylla* (Singer) Singer  
References: Karadelev et al. 2008h.
1375. ***Pseudoclitocybe cyathiformis*** (Bull.) Singer  
References: Karadelev 2001a; Karadelev and Rusevska 2000; Karadelev et al. 2003a; Karadelev and Murati 2008.
1376. ***Pseudoclitocybe obbata*** (Fr.) Singer  
References: Karadelev et al. 2003a.
1377. ***Pseudocraterellus undulatus*** (Pers.) Rauschert  
Syn. *Craterellus sinuosus* (Fr.) Fr

1583. *Strobilurus stephanocystis* (Kühner & Romagn. ex Hora) Singer.

References: Karadelev and Rusevska 2000; Karadelev et al. 2003a; Karadelev et al. 2007a.

1584. *Strobilurus tenacellus* (Pers.) Singer.

References: Karadelev et al. 2003a; Rusevska and Karadelev 2004; Karadelev et al. 2007a.

1585. *Stropharia aeruginosa* (Curtis) Quél.

References: Karadelev 2000d; Karadelev and Rusevska 2000; Karadelev et al. 2003a, 2004a.

1586. *Stropharia caerulea* Kreisel

Syn. *Stropharia cyanea* Tuom.

References: Karadelev et al. 2003a.

1587. ***Stropharia coronilla*** (Bull.) Quél.  
Syn. *Psilocybe coronilla* (Bull.) Noordel.  
References: Karadelev 2000d; Karadelev et al. 2003a, 2004a, 2004b; Karadelev and Spasikova 2004a, 2004b, 2009; Rusevska and Karadelev 2004; Karadelev and Murati 2008.
1588. ***Stropharia pseudocyanea*** (Desm.) Morgan  
Syn. *Stropharia albocyanea* (Fr.) Quél.  
Shar Planina Mt.: *Abieti-Piceetum scardicum*, soil, 16.10.2000.
1589. ***Subulicystidium longisporum*** (Pat.) Parmasto.  
References: Karadelev 1993, 1994, 1995, 1998, 2000c, 2000e, 2001b; Karadelev et al. 2008g; Ordynets et al. 2018.
1590. ***Subulicium rallum*** (H.S. Jacks.) Jülich & Stalpers  
Syn. *Peniophora ralla* H.S. Jacks.  
Dobra Voda Mt.; *Fago-Pinetum sylvestris*, *Pinus sylvestris* (rotten trunk), 11.10.2011.
1591. ***Suillellus dupainii*** (Boud.) Blanco-Dios  
Syn. *Boletus dupainii* Boud.  
References: Karadelev et al. 2006, 2008a; Karadelev and Rusevska 2008, 2013.
1592. ***Suillellus queletii*** (Schulzer) Vizzini, Simonini & Gelardi  
Syn. *Boletus queletii* Schulzer  
Syn. *Boletus queletii* var. *lateritius* (Bres. & Schulzer) E.-J. Gilbert  
References: Karadelev 2000d, 2001a; Karadelev and Rusevska 2004; Karadelev et al. 2003b, 2006, 2008a, 2008d.
1593. ***Suillellus luridus*** (Schaeff.) Murrill  
Syn. *Boletus luridus* Schaeff.  
References: Pilát and Lindtner 1939; Tortić 1988; Karadelev 2000d, 2001a; Karadelev and Spasikova 2004; Karadelev et al. 2003a, 2003b, 2004a, 2006, 2008a; Karadelev and Murati 2008; Bauer-Petrovska et al. 2008b, 2008d.
1594. ***Suillellus mendax*** (Simonini & Vizzini) Vizzini  
Syn. *Boletus mendax* Simonini & Vizzini  
Skopje (vicinity): oak forest, soil, 20.05.2018; Korab, *Abieti-Fagetum*, soil, 10.06.2018.
1595. ***Suillellus pulchrotinctus*** (Alessio) Blanco-Dios  
Syn. *Boletus pulchrotinctus* Alessio  
References: Karadelev et al. 2006; Karadelev et al. 2007a; Karadelev and Rusevska 2013.
1596. ***Suillellus rhodoxanthus*** (Krombh.) Blanco-Dios  
Syn. *Boletus rhodoxanthus* (Krombh.) Kallenb.  
References: Pilát and Lindtner 1939; Tortić 1988; Karadelev 1999b, 2000a; Karadelev et al. 2006; Karadelev and Rusevska 2008; Bauer-Petrovska et al. 2008b, 2008d.
1597. ***Suillellus rubrosanguineus*** (Cheype) Blanco-Dios  
Syn. *Rubroboletus rubrosanguineus* (Cheype) Kuan Zhao & Zhu L. Yang  
References: Karadelev and Rusevska 2016b.
1598. ***Suillus bovinus*** (L.) Roussel.  
References: Karadelev and Rusevska 2002; Karadelev et al. 2003a; 2007b.
1599. ***Suillus collinitus*** (Fr.) Kuntze.  
Syn. *Suillus fluryi* Huijsman.  
References: Tortić 1988; Karadelev and Rusevska 2002; Karadelev et al. 2003a, 2007b, 2008g; Rusevska and Karadelev 2004; Bauer-Petrovska et al. 2008a; Karadelev and Murati 2008.
1600. ***Suillus flavidus*** (Fr.) Singer.  
References: Karadelev and Rusevska 2013.
1601. ***Suillus granulatus*** (L.) Roussel.  
References: Tortić 1988; Karadelev 2001a; Karadelev et al. 2002b, 2003a, 2007b; Karadelev and Rusevska 2002, 2004; Rusevska and Karadelev 2004; Karadelev and Murati 2008.
1602. ***Suillus grevillei*** (Klotzsch.) Singer.  
References: Tortić 1988; Karadelev et al. 2007a.
1603. ***Suillus luteus*** (L.) Roussel.  
References: Tortić 1988; Karadelev 2001a; Karadelev and Rusevska 2000, 2004; Karadelev et al. 2003a, 2004a, 2007b, 2008a, 2008g; Rusevska and Karadelev 2004; Karadelev and Murati 2008.
1604. ***Suillus mediterraneensis*** (Jacquet. & J. Blum) Redeuilh.  
References: Karadelev et al. 2007b.

1605. *Suillus plorans* (Rolland) Kuntze.

References: Karadelev et al. 2003a; Karadelev et al. 2007b.

1606. *Suillus sibiricus* (Singer) Singer.

Syn. *Suillus sibiricus* subsp. *helveticus* Singer

References: Tortić 1968; Karadelev 1988, 1999b, 2000a; Karadelev and Rusevska 2000, 2008, 2013; Karadelev et al. 2002d, 2003a, 2007b; Bauer-Petrovska et al. 2008a.

1607. *Suillus tridentinus* (Bres.) Singer

Dobra Voda Mt.: *Quercetum frainetto-cerris* (with planted pine), soil, 18.12.2012.

1608. *Suillus variegatus* (Sw.) Kuntze.

References: Karadelev et al. 2007b.

1609. *Sutorius luridiformis* (Rostk.) G. Wu & Zhu L. Yang

Syn. *Boletus luridiformis* Rostk.

Syn. *Boletus luridiformis* var. *discolor* (Quél.) Krieglst. Skopska Crna Gora Mt.: oak forest, soil, 11.06.2017.

## T

1610. *Tapinella atrotomentosa* (Batsch) Šutara

Syn. *Paxillus atrotomentosus* (Batsch.) Fr.

References: Karadelev 1993, 1995c, 1999a, 1999b, 2000, 2001a; Karadelev and Rusevska 2000; Karadelev et al. 2003a.

1611. *Tapinella panuoides* (Fr.) E.-J. Gilbert

Syn. *Paxillus panuoides*(Fr.) Fr.

Reference: Nastov et al. 1996; Rusevska and Karadelev 2004.

1612. *Terana caerulea* (Schrad. ex Lam.) Kuntze

Syn. *Pulcherricium caeruleum* (Schrad. ex Lam.) Parmasto

References: Pilát and Lindtner 1937 Pilát and Lindtner 1938; Tortić and Karadelev 1986; Tortić 1988; Karadelev 1993, 2001a; Karadelev and Murati 2008; Ordynets et al. 2018.

1613. *Thanatephorus fusisporus* (J. Schröt.) Hauerslev & P. Roberts

Syn. *Uthatobasidium fusisporum* (J. Schröt.) Donk

References: Tortić 1983; Ordynets et al. 2018.

1614. *Thanatephorus ochraceus* (Massee) P. Roberts

Syn. *Uthatobasidium ochraceum* (Massee) Donk

References: Tortić 1985; Karadelev 1999b, 2000a.

1615. *Thelephora anthocephala* (Bull.) Fr.

References: Ordynets et al. 2018.

1616. *Thelephora caryophyllea* (Schaeff.) Pers.

Reference: Tortić 1988; Karadelev et al. 2002b; Rusevska and Karadelev 2004; Ordynets et al. 2018.

1617. *Thelephora palmata* (Scop.) Fr.

Reference: Karadelev et al. 2002b, 2008a; Ordynets et al. 2018.

1618. *Thelephora terrestris* Ehrh.

Reference: Karadelev et al. 2003a, 2008a.

1619. *Tomentella bourdotii* Svrcek

Reference: Tortić 1988.

1620. *Tomentella bryophila* (Pers.) M.J. Larsen.

Reference: Litschauer 1939; Karadelev 1999c, 2000b.

1621. *Tomentella cinerascens* (P. Karst.) Hohn. & Litsch.

Reference: Litschauer 1939; Tortić 1988.

1622. *Tomentella crinalis* (Fr.) M.J.Larsen

Syn. *Odontia ferruginea* Pers.

Reference: Litschauer 1939; Tortić 1988; Ordynets et al. 2018.

1623. *Tomentella ellisi* (Sacc.) Jülich & Stalpers

Syn. *Tomentella ochracea* (Sacc.) M.J.Larsen.

Reference: Litschauer 1939; Tortić 1988; Karadelev 1999c, 2000b.

1624. *Tomentella ferruginella* Bourdot & Galzin

References: Ordynets et al. 2018.

1625. *Tomentella fusca* (Pers.) J. Schröt.

Syn. *Tomentella ferruginea* (Pers.) Pat.

References: Ordynets et al. 2018.

1626. *Tomentella fuscoferruginosa* (Bres.) Litsch.

Reference: Litschauer 1939; Tortić 1988.

1627. *Tomentella gilva* Bourdot & Galzin

Reference: Litschauer 1939; Tortić 1988.

1628. ***Tomentella griseoviolacea*** Litsch.

Reference: Litschauer 1939; Tortić 1988.

1629. ***Tomentella hoehnelii*** Skovst.

Reference: Litschauer 1939.

1630. ***Tomentella litschaueri*** Svrcek.

Reference: Litschauer 1939; Tortić 1988.

1631. ***Tomentella punicea*** (Alb. & Schwein.) J. Schröt.

Reference: Litschauer 1939; Tortić 1988; Ordynets et al. 2018.

1632. ***Tomentella rubiginosa*** (Bres.) Maire

Reference: Litschauer 1939; Tortić 1988.

1633. ***Tomentella spongiosa*** (Schwein.) Höhn. & Litsch.

Reference: Litschauer 1939; Tortić 1988.

1634. ***Tomentella stuposa*** (Link) Stalpers

Syn. *Tomentella bresadolae* (Brinkmann) Höhn. & Litsch.

Reference: Litschauer 1939; Tortić 1988.

1635. ***Tomentellopsis echinospora*** (Ellis) Hjortstam

Shar Planina Mt.: *Calamintho grandiflorae-Fagetum*, *Fagus* (rotten wood), 17.07.1997; Veles–Gradsko: riparian vegetation, *Populus* (rotten wood), 25.11.2014.

1636. ***Trametes cervina*** (Schwein.) Bres.

Reference: Tortić 1988; Karadelev 1993, 1994, 1995c; Karadelev et al. 2008g.

1637. ***Trametes gibbosa*** (Pers.) Fr.

Reference: Pilát 1937, 1936-42; Pilát and Lindtner 1938; Grujoska 1970; Tortić 1988; Karadelev 1993, 1994, 1995c, 2000d; Nastov et al. 1996; Karadelev et al. 2002a, 2002c, 2002b, 2003b, 2004a, 2008g; Karadelev and Murati 2008; Ordynets et al. 2018.

1638. ***Trametes hirsuta*** (Wulfen) Pilát

Reference: Pilát 1937; Pilát and Lindtner 1938; Koleva–Šekutkovska 1959; Grujoska 1970; Tortić and Cekova 1975; Tortić and Karadelev 1986; Tortić 1988; Karadelev 1989, 1993, 1994, 1995a, 1995c, 1998, 2000e, 2000d, 2001b; Nastov et al. 1996; Karadelev et al. 2002a, 2002d, 2003b, 2004a, 2008a, 2008d, 2008h, 2008g; Karadelev and Murati 2008; Karadelev and Rusevska 2002, 2004; Ordynets et al. 2018.

1639. ***Trametes ljubarskyi*** Pilát.

Reference: Tortić 1975; Karadelev 1989, 1995a, 1998, 1999b, 2000a; Karadelev and Rusevska 2013; Ordynets et al. 2018.

1640. ***Trametes ochracea*** (Pers.) Gilb. & Ryvarden

Syn. *Trametes multicolor* (Schaeff.) Julich.

Reference: Grujoska 1970; Karadelev 1993; Karadelev et al. 2003b, 2008a; Karadelev and Murati 2008; Ordynets et al. 2018.

1641. ***Trametes pubescens*** (Schumach.) Pilát.

References: Pilát 1937, 1936-42; Pilát and Lindtner 1938; Tortić and Cekova 1975; Tortić 1988; Karadelev 1993; Karadelev et al. 2004a, 2008h; Rusevska and Karadelev 2004; Karadelev and Murati 2008; Ordynets et al. 2018.

1642. ***Trametes suaveolens*** (L.) Fr.

References: Karadelev and Murati 2008; Karadelev et al. 2008h; Ordynets et al. 2018.

1643. ***Trametes versicolor*** (L.) Lloyd

References: Pilát and Lindtner 1938; Koleva–Šekutkovska 1959; Grujoska 1970; Tortić and Cekova 1975; Tortić and Karadelev 1986; Tortić 1988; Karadelev 1988, 1993, 1989, 1994, 1995a, 1995b, 1995c, 1996, 2000d, 2000e, 2001b; Karadelev and Savova 1995; Nastov et al. ## Lacewings (Insecta: Neuroptera) in the collection of the Macedonian Museum of Natural History in Skopje

Dušan Devetak<sup>1\*</sup> and Reshat Zeqiri<sup>2</sup>

<sup>1</sup>Department of Biology and Institute for Biology, Ecology and Nature Conservation, FNM, University of Maribor, Koroška cesta 160, 2000 Maribor, Slovenia

<sup>2</sup>Macedonian Museum of Natural History, Blvd. Ilinden 86, 1000 Skopje, Republic of Macedonia

\*corresponding author, e-mail: dusan.devetak@guest.arnes.si

### Abstract

Information is provided on 27 species of lacewings (Insecta: Neuroptera) deposited in the Macedonian Museum of Natural History in Skopje, Macedonia. Five species are new to Macedonian fauna: *Chrysopa commata*, *Chrysopa nigricostata*, *Cueta lineosa*, *Dendroleon pantherinus*, and *Neuroleon tenellus*. The finding of the species *Neuroleon tenellus* extends its known distribution range in the Balkans widely to the north.

**Key words:** Neuroptera, lacewings, fauna, Balkan Peninsula, Republic of Macedonia

### Introduction

The Macedonian Museum of Natural History in Skopje was founded by Stanko Karaman in 1926. He was inspired by the monograph "Mazedonien" published by Franz Doflein in 1921, which contained, among others, a chapter devoted to Macedonian antlions, owlflies and spoonwings (Doflein 1921). During the Second World War, the Museum became a part of the Imperial Natural History Museum of Sofia. During that period, Krastuy Tuleshkov was appointed as museum's director. He collected insects of different orders, among them also Neuropterans. After the Second World War, a rapid development of the museum started. When Petar Ikonomov was appointed as the director, the Museum worked intensively on collecting and preserving different materials. A renaissance of the museum activities resulted in the establishment of different departments, one of them was the Department of Entomology.

Unlike the more popular Lepidoptera and Coleoptera, the beginnings of the Neuroptera collection in the Museum were more modest. The oldest lacewings collected dates back to 1939. In 1990s, the collection of Neuroptera was inspected by Alexi Popov, who identified some of the lacewings deposited in the collection. Unfortunately, the data were not published. Due to the

progress in the taxonomy of the Neuropterida during the last decades, a revision of the lacewing collection was urgent. Despite of the fact, that the collection of lacewings is a small one, with approximately 400 individuals, it contains some rare species with an interesting distribution.

Until now, the lacewing fauna of Macedonia was insufficiently investigated and the knowledge is based on a great number of mainly sporadic records. A list of papers dealing with Macedonian Neuroptera is presented in Hristovski et al. (2015), Devetak et al. (2015a). Prior this study, 60 species of Neuroptera were known for the country (Hristovski et al. 2015, Devetak et al. 2015a). The aim of the present paper is to provide an updated list of lacewings (Neuroptera) in the Department of Entomology of the Museum.

### Material and methods

We examined 400 pinned lacewings. We followed the nomenclature and taxonomy proposed by Aspöck et al. (1980, 2001), Monserrat (2016), and *Lacewing Digital Library* (Oswald 2017). Zoogeographical categorization of Neuroptera is used in accordance with Aspöck et al. (2001), Popov and Letardi (2010), and Devetak et al. (2015a). Data on the distribution of

the taxa were extracted from *Fauna Europaea*, version 2017.06 (Aspöck et al. 2013). Abbreviations used in the text: Mt. = mountain, r. = river.

## Results

### NEUROPTERA

#### Suborder Hemerobiiformia

##### OSMYLIDAE

###### *Osmylus fulvicephalus* (Scopoli, 1763)

Material examined:

Macedonia:

Buković Mt. (=Planina Buković); 31.05.1977; J. Čingovski leg., 18 ind.

Žeden Mt: Nerašte village, Vratnička river; 31.05.2015; V. Krpač & R. Zeqiri leg., 1 ind.

Distribution:

Europe, Asia (Anatolia).

##### CHrysopidae

###### *Italochrysa italica* (Rossi, 1790)

Material examined:

Macedonia:

Dojran, Ačikot; 28.06.1994; 1 ind., V. Krpač leg.

Matka; 16.07.1943; 1 ind., K. Tuleshkov leg.

Distribution:

Europe (Mediterranean part), Asia (Middle East).

Zoogeography: Holomediterranean.

###### *Chrysopa perla* (Linnaeus, 1758)

Material examined:

Macedonia:

Mavrovo; 29.06.1979; 1 ind., J. Čingovski leg.;

Mavrovo; 27.05.1981; 1 ind., J. Čingovski leg.

Skopje; 06.08.1943; 1 ind., K. Tuleshkov leg.

Distribution:

Europe, Asia.

Zoogeography: Euro-Siberian spread, polycentric, highly expansive.

###### *Chrysopa commata* Kis & Újhelyi, 1965

Vodno Mt.; 20.06.1942; 1 male, K. Tuleshkov leg.

Distribution:

Europe: Great Britain (England), Germany, Austria, Czech Republic, Slovakia, Latvia, Poland, Hungary, Ukraine, Romania, Republic of Moldova, Serbia, and Bulgaria.

Asia: Caucasus, Iran, Tajikistan, Siberia, and Kuril Islands (Aspöck et al. 2001, Aspöck et al. 2013). Zoogeography: Siberian.

New species for the fauna of R. Macedonia.

###### *Chrysopa formosa* Brauer, 1851

Katlanovo; 19.07.1957; 1 ind., S. Joksimović leg.

Skopje. 29.06.1941, 1 ind., 19.05.1942 1 ind., 19.06.1942 4 ind., 25.07.1942 1 ind., 29.07.1942 1 ind., 04.08.1942 2 ind., 04.08.1943 2 ind., 05.08.1943 2 ind., 30.07.1944 1 ind., 19.06.1945 1 ind.; all leg. K. Tuleshkov.

Skopje, Zelenikovo; 23-26.08.1954; 1 ind., K. Begoevski leg.

Vodno Mt.; 17.06.1945; 1 ind., P. Ilkonomov leg.

Distribution:

Europe, Africa (Mediterranean part), Asia.

Zoogeography: Euro-Siberian and Holomediterranean spread, polycentric, expansive.

###### *Chrysopa nigricostata* Brauer, 1851

Material examined:

Macedonia:

Skopje, 19.06.1942, 1 male, K. Tuleshkov leg.

Distribution:

Europe, Africa (Mediterranean part), Asia.

Zoogeography: Holomediterranean (expansive northwards).

**New species for the fauna of R Macedonia.**

***Chrysopa pallens* (Rambur, 1838)**

Material examined:

Macedonia:

Berovo; 20.08.1977; 1 ind., J.Čingovski leg. (non: *C. nigricostata*!)

Vodno Mt.; 17.06.1945; 1 ind., K.Tuleshkov leg.

Comment: Recently, two sibling species (*Chrysopa pallens*, *C. gibeauxi*) were recognized as valid (Tillier et al. 2014, Devetak et al. 2015b). The species *C. pallens* (in a strict sense) is referred for Macedonia by Devetak et al. (2015b).

Distribution:

Europe, Africa (Mediterranean part), Asia.

Zoogeography: Zoogeographic categorization is still uncertain.

***Pseudomallada flavifrons flavifrons* (Brauer, 1851)**

Material examined:

Macedonia:

Skopje, Treska r.; 31.07.1942; 1 ind., K.Tuleshkov leg.

Distribution:

Europe, Africa (Mediterranean part), Asia.

Zoogeography: Zoogeographic categorization is uncertain because of taxonomic problems; from the current perspective, Mediterranean spread, polycentric, particularly expansive northwards.

***Pseudomallada abdominalis* (Brauer, 1856)**

Material examined:

Macedonia:

Skopje; 04.08.1943; 1 ind., K.Tuleshkov leg.

Distribution:

Europe.

Zoogeography: Zoogeographic categorization is still uncertain.

***Pseudomallada zelleri* (Schneider, 1851)**

Material examined:

Macedonia:

Vodno Mt.; 20.06.1942; 1 ind., K.Tuleshkov leg. (On the label: »*Mallada prasinus*«; this is incorrect identifi-

cation!).

Distribution:

Europe (Mediterranean part), Asia (Middle East).

Zoogeography: Balkano-Pontomediterranean (expansive westwards).

***Chrysoperla carnea* (Stephens, 1836) sensu lato**

Material examined:

Macedonia:

In the collection, we recorded 22 individuals belonging to the complex of the common green lacewing species (*C. carnea* s.l.). Because the song data are missing, and their colouration has changed during the year, it was impossible to identify them to the species level.

***Suarius nanus* (McLachlan, 1893)**

Material examined:

Macedonia:

Vodno Mt.; 24.06.1945; 1 m, K.Tuleshkov leg.

Distribution:

Europe (East-Mediterranean part), Asia.

Zoogeography: Pontomediterranean – Anatolian.

**Suborder Myrmeleontiformia**

**NEMOPTERIDAE**

***Nemoptera sinuata* Olivier, 1811**

Material examined:

Macedonia:

Demir Kapija: Vardar r.; 18.06.2006, 1 ind., V.Krpač leg.

Dojran; 06.06.1975, 6 ind., J.Čingovski leg.

Dojran; 30.05.1979; 20 ind., B.Mihajlova leg.

Dojran: Nikolič village; 10.06.1997; 12 ind., V.Krpač leg.

Galičica Mt.: Asandjura /Asan Đura/, Peštera Samatska Dupka; 23.06.2010, 1 ind., V.Krpač leg.

- Zoogeography: Holomediterranean.

### ***Myrmecaelurus trigrammus* (Pallas, 1771)**

Material examined:

Macedonia:

Gevgelija, Negorci; 31.07.1969; 2 females, J.Čingovski leg.

Katlanovo, Crn Vrv; 22.07.1971; 1 ind.; J.Čingovski leg.

Pčinja r.; 12.07.1962; 1 ind., J.Čingovski leg.

Radoviš, Kozbunar village; 19.07.1947; 1 ind., K.Bogoevski leg.

Skopje: Orešani village; 14.06.1945; 1 ind., K.Bogoevski leg.

Skopje: Zelenikovo; 23.-26.08.1954; 2 ind., K.Bogoevski leg.

Veles, Otvica village; 13.07.1970; 1 ind., J.Čingovski leg.

Veles, Otvica village; 22.06.1972; 1 ind., J.Čingovski leg.

Vodno Mt.; 2.08.1941; 1 ind., K.Bogoevski leg.

Vodno Mt.; 04.08.1941; 1 ind., G.Stojanov leg.

Vodno Mt.; 13.07.1954; 1 ind., P.Ivanovski leg.

Distribution:

Europe (Mediterranean part), Asia.

Zoogeography: Holomediterranean.

### ***Cueta lineosa* (Rambur, 1842)**

Material examined:

Macedonia:

Skopje, Gradski park; 13.08.1945; 1 ind., K.Bogoevski leg.

Vodno Mt., VI. 1945, 1 ind., K.Tuleshkov leg.

Distribution:

Europe: Albania, Greece, Bulgaria, Macedonia, and southern Italy (Aspöck et al. 2001; Aspöck et al. 2013; Kačírek 2013; Devetak and Rausch 2016; this paper) (Fig.1).

It has also been recorded in North Africa, the Middle East, Caucasus, Russia (Dagestan, North Ossetia), Iran, Afghanistan, Pakistan, Turkmenistan, and Uzbekistan (Aspöck et al. 2001; Krivokhatsky 2011).

Zoogeography: Eremial.

New species for the fauna of R. Macedonia.

***Myrmeleon (Myrmeleon) formicarius* Linnaeus, 1767**

Material examined:

Macedonia:

Berovo; 10.07.1978; 1 male, J.Čingovski leg.

Brana Kozjak /=Kozjak Dam/, Treska r.; 01.06.2004; 1 male, V.Krpač leg.

Jakupica Mt., Mumđica; 09.07.1989; 1 female, V.Krpač leg.

Mavrovo; 26.07.1974; 1 female, J.Čingovski leg.

Mavrovo; 12.08.1990; 1 female, V.Krpač leg.

Nidže Mt., Škočivir village; 20.06.1984; 1 female, B.Mihajlova leg.

Patiška Reka, Kula; 03.06.1993; 1 female, V.Krpač leg.

Stari Dojran; 26.05.1996; 2 females, V.Krpač leg.

Valandovo, Bašbos village; 24.05.1986; 1 female, N.Topukova leg.

Vodno Mt.; 21.05.1942; 1 female, G.Stojanov leg.

Žeden Mt.; 23.05.1994; 2 females, V.Krpač leg.

Distribution:

Europe, Asia.

Zoogeography: Euro-Siberian.

***Myrmeleon (Myrmeleon) noacki* Ohm, 1965**

Material examined:

Macedonia:

Skopje, Treska r.; 06.07.1942; 1 female, G.Stojanov leg.

Comment: The original description of this species is based on the paratypes originating from Macedonia (Drenovo near Kavadar; Ohm, 1965).

Distribution:

Europe (East-Mediterranean part), Asia (Anatolia).

Zoogeography: Balkano- and Anatolo-Pontomediterranean.

***Dendroleon pantherinus* (Fabricius, 1787)**

Material examined:

Macedonia:

Ohrid; 10.07.1945; 1 ind. (missing body parts), P.Ikonomov leg.

Jablanica Mt., Drenok; 1106 m a.s.l.; 19.08.2016; 1 ind., V.Krpač & R.Zeqiri leg.

Distribution:

Europe: widely distributed (Aspöck et al. 2013).

Asia: Turkey, Caucasus, and China (Aspöck et al. 2001).

Zoogeography: Siberian.

New species for the fauna of R. Macedonia.

***Macronemurus bilineatus* Brauer, 1868**

Material examined:

Macedonia:

Gevgelijska, Negorci village; 31.07.1969; 2 ind., J.Čingovski leg.

Katlanovo; VII. 1959; 1 ind., J.Čingovski leg.

Ohrid: Hidrobiološka stanica /=Hydrobiological station/; 23.07.1939; 1 ind., Z.Karaman leg.

Skopje; 14.08.1941; 1 ind., G.Stojanov leg.

Resen, Prespansko Ezero: Kurbinovo village; 29.06.2016; 1 male, M.Ivanov leg.

Vodno Mt., vrv; 29.07.1940; 7 ind., D.Rukner leg.

Distribution:

Europe (East-Mediterranean part), Asia.

Zoogeography: Balkano- and Anatolo-Pontomediterranean.

***Neuroleon (Neuroleon) microstenus* (McLachlan, 1898)**

Material examined:

Macedonia:

Vodno Mt.; 09.08.1945; 1 ind., K.Bogoevski leg.

Lazaropole; 25.08.1954; 2 males, S.Karaman leg.

Distribution:

Europe, Africa (Mediterranean part), Asia.

Zoogeography: Holomediterranean.

***Neuroleon (Ganussa) tenellus* (Klug in Ehrenberg, 1834)**

Material examined:

Macedonia:

Pčinja stojalište (the original text on the label:

Figure 1. Distribution of *Cueta lineosa* in the Balkan Peninsula.

Figure 2. Distribution of *Neuroleon tenellus* in the Balkan Peninsula.

»Železnička stanica Pčinja« /=Railway Station Pčinja/; 05.-11.08.1954, 2 ind., K.Bogoevski leg.

The collecting place is near the railway station, with the coordinates 41°49'07.7"N 021°40'10.9"E.

The two individuals were in a bad state, damaged by mould.

#### Distribution:

Europe: Greece: Greek mainland, Cyclades, and Crete (Aspöck et al. 1980, 2001; Saure 1989; Aspöck et al. 2013).

Asia: Middle East, Afghanistan, Turkmenistan (Aspöck et al. 2001).

So far, in Europe, the species was known from only three collecting places, all in Greece (Monemvasia in Peloponnes, Naxos, and Crete; Fig. 2).

Zoogeography: Eremial.

#### New species for the fauna of R Macedonia.

##### *Distoleon tetragrammicus* (Fabricius, 1798)

#### Material examined:

Macedonia:

Belasica Mt.; 09.07.1966; 1 male 2 females, N.Topukova leg,

Konečka Planina /=Konečka Mt./; 03.07.1987; 1 female, N.Topukova leg..

Resen, Prespansko Ezero: Kurbinovo village; 25.06.2014, 1 ind.; 17.06.2015, 1 ind.; 19.06.2015, 3 ind., all M.Ivanov leg.

Skopje: Kučkovo village; 03.07.1976; 1 ind., J.Čingovski leg.

Veles: Novačani village; 21.06.1974, 1 ind., J.Čingovski leg.

Žeden Mt.; 02.07.1976, 2 ind., J.Čingovski leg.

Montenegro:

Crna Gora: Mojkovac; 21.06.1971, 1 ind., J. Čingovski leg.

Distribution:

Europe, Asia.

Zoogeography: Balkano- and Anatolo-Pontomediterranean, highly expansive.

**Discussion**

Although the Neuroptera of the Balkan Peninsula have been studied since the 19<sup>th</sup> century, the distribution of many species in the area is little known. The

fauna of the Neuroptera of Macedonia was until the recent period insufficiently known and a great number of sporadic data on the species occurrence in the country exists (for reviews of relevant papers see Hristovski et al. 2015, Devetak et al. 2015a). In the paper we present collecting places for 27 species originating from the country, among them five species are new to Macedonian fauna. With the new findings, the number of known Neuroptera in Macedonia has now raised to 65.

Two antlion species are rare. *Cueta lineosa* occurs in Europe in south Italy and the Balkan Peninsula. *Neuroleon tenellus* is a little known and very rare species, in Europe known only from four localities (Aspöck et al. 1980, 2001, Saure 1989, Aspöck et al. 2013, this paper).

### Acknowledgements

DD is grateful to Vladimir Krpač who helped to clarify some problems regarding identity of collecting places, and DD is grateful to Slavčo Hristovski for all his efforts made to arrange the accommodation during the visits of the country in 2017. Both authors are grateful to Slavčo Hristovski and two more anonymous reviewers for their comments to earlier draft of the manuscript. The study was partly supported by the Erasmus Plus grant, and partly by the Infrastructure program of the University of Maribor (CORE@UM, I0-0029).

## Мрежокрилците (Insecta: Neuroptera) во збирката на Природонаучниот музеј на Македонија во Скопје

Душан Деветак и Решат Зекири

За ова истражување беше направена ревизија на колекцијата на Neuroptera која се чува во Природонаучниот музеј на Македонија во Скопје. И покрај фактот што колекцијата на мрежокрилци е мала, со околу 400 примероци, таа содржи некои ретки видови со интересна дистрибуција. До сега, фауната на мрежокрилци на Македонија е недоволно истражена, а знаењето се базира главно на голем број инцидентни податоци. Тука е дадена информација за 27 вида мрежокрилци, меѓу кои пет се нови за македонската фауна: *Chrysopa commata*, *Chrysopa nigrifastata*, *Cueta lineosa*, *Dendroleon pantherinus* и *Neuroleon tenellus*. Видот *Cueta lineosa* е редок мрежокрилец, пред оваа студија на Балканот познат за Албанија, Грција и Бугарија. Наодот на вториот интересен вид, *Neuroleon tenellus*, пред оваа студија познат за Европа само од три локалитети во Грција, го проширува неговиот ареал на распространување на Балканот далеку на север. Со новите наоди, бројот на познати Neuroptera во Македонија се подига на 65 видови.

**Клучни зборови:** Neuroptera, мрежокрилци, фауна, Балкански Полуостров, Република Македонија
